Ives Throws Out Verdict of the Jury

Sticks MacMillan's for Costs of Seduction Action.—Brownlee May Not Resign—People Astounded at Decision of Judge to Overrule Jury

Lower Voting Age Wish of Convention

That the voting age of both sexes be reduced from 21 years to 18 years was a resolution which passed after a serious discussion at the U.F.A. Western Federal Constituency convention, held in Lacombe on June 26th. Expressed opinion was that an earlier voting age would tend to induce more interest in political matters by the young people; also that as young people had been considered old enough to assume matrimonial responsibilities, be sent to war, etc., before attaining the age of 21, they ought to have a voice in present day matters, on which it was felt they are as fully informed as many of the older generation.

Strong objection to the amendment to the liquor control act, recently passed by the legislature was expressed in a resolution from Grand Master U.F.A. asking that this amendment be rescinded at the earliest possible moment. Discussion following seemed about equally divided, some suggesting that the Government should be given a vote of censure, others defending the action of the government. In the close vote which followed, the motion was lost.

Two resolutions were tabled: one amending the Municipal Elections Act, and one in favor of the C.O.P.F. platform with Douglas Social Credit plank. In connection with the latter, the statement was made that a platform is being prepared for presentation at the U.F.A. Provincial Convention.

Meeting in Church Hall, which was filled to capacity, and with a voting strength of 62, the Convention opened in the morning and appointed committees as follows: Resolutions, Henry D. Young, Mait; G. Oatmeal, Mrs. Ives, H. E. Seaman. Credentials, Mrs. F. Hunter, L. G. Snow, H. Storch.

Acting on behalf of the Mayor, Thos. Wilkes, Councillor, welcomed the delegates, and invited them to visit the various points of interest during their visit to Lacombe. The Town also volunteered to pay the rental of the Hall where the convention was meeting, and F. H. Reed, Superintendent of the Experimental Station, at the adjournment of the afternoon session personally conducted a tour about the Farm. Delegates then repaired to the I.O.O.F. Hall, where a banquet prepared by the Ladies of the Eastern Star awaited them.

An enthusiastic address by H. Haskins, Olive, President of the last four years and re-elected for the fifth term at this meeting, gave a seal to the convention which lasted during the afternoon. There was no

reason for discouragement, he felt, in the face of the fact that with such a few men spreading the Gospel in Saskatchewan, their efforts had been productive of some eighty thousand votes. He paid high tribute to Wm. Irvine, M.P., who had predicted this depression if the Government did not take drastic action. Criticism was directed at the Liberal government, who in 1933 practically refused the platform on which they had been elected in 1917.

A lengthy report from Wm. Irvine, M.P., on the Budget, Marketing Bill, Central Bank Act, Farm Loans, etc., was read, following which a resolution confirming in strongest terms his confidence in Mr. Irvine was passed by the Convention.

Geo. Church and A. Riley, Calgary representing the Co-operative committee, answered many questions concerning the payment of dividends and other operations of the Committee. An outline of what U.F.A. is trying to do in a co-operative way was given by Mr. Church, who said the gross turnover last year had been \$375,000.00. Largest turnover of \$65,000.00 had been in the Acadia constituency, in the deepest part of the province, over a million pounds of twine had been shipped last year, despite the crop shortage, and this year the amount ought to be doubled. In 1932, seven tank cars of oil at a saving of 20c. per gal. and a return of 4c. per gal. dividend, had been turned over. If half of the purchasing power of the farmers in the Province, were behind them, the speaker claimed that much larger savings for members could be made.

J. G. Baker of Bitter Lake was chosen to fill the place on the Board of H. Bentine, who had removed from the province.

Officers elected were President, H. Haskins, Olive, First Vice-President, Mrs. W. C. Rossell, Mait; second Vice-President, A. E. Paulkner, Leduc.

A telegram from Mr. Irvine, read just before adjournment, announced that J. S. Woodworth, M.P., would address a mass meeting at Wetaskiwin on July 26th.

Convention date for Lacombe Provincial Constituency was set at July 23rd, in Lacombe, at a meeting of the Board of Executives held on Tuesday morning in the Town Hall. C. Welferson of Alton, was appointed a committee to arrange for convention speakers.

In the Evening

A protest against the expenditure by the Dominion Government of \$1,400,000 on buildings to house militia forces in Alberta, was the content of a resolution passed unanimously at an open public meeting following the U.F.A. convention on Tuesday evening, June 26th and

Following the musical numbers S. Edmonds, for twenty-seven years an employee of the Station, on behalf of the Staff presented Mr. and Mrs. Reed with a silver tray and a combination toaster and waffle iron, and expressed the appreciation of the members of the staff for the personal interest Mr. and Mrs. Reed have always taken in their welfare; and on behalf of Brennan, Roderick and Charles Reed, made a presentation of a silver percolator.

Mr. and Mrs. Reed expressed their sincere appreciation of the gifts and the sentiment prompting the giving, and both agreed that after twenty-five years of happy married life, they would make the same choice over again. Given another chance they would make the same choice over again. Given another chance they would make the same choice over again. Given another chance they would make the same choice over again.

Warm discussion ensued over a resolution to invite the Farmers' Unity League to a seat in the C.O.P.F. Council, which was lost in the vote. A resolution for law enactment to protect the children of the first wife to that the father cannot will all his property to the children of the second wife, was referred to the Board of Directors for disposal.

The following directors were elected: East Leduc and Clover Bar, M. Latam; W. Leduc, Mr. McLaren; Ponoka, Mrs. W. Archibald; Wetaskiwin, J. G. Baker; Lacombe, O. S. Young.

Chester Honning, M.L.A., Camrose, speaker of the evening public meeting pointed out the evils of the capitalistic system as compared to the ideal contained in the 14 policies of the C.O.P.F. platform, which include socialization of finance, public utilities and industries, Agriculture, health services, marketing, the alteration of the B.N.A. act to suit the needs of the people, the abolition of the Senate and the establishment of National Boards. Mr. Honning was given an enthusiastic vote of thanks at the conclusion of his address. Master Victor Wright who sang a solo was heartily cheered.

F. H. Reed Is Banquet Guest

The members of the Staff of the Dominion Experimental Station, Lacombe and their families assembled to the skirling of the bagpipes, on Friday, June 29th at 8 p.m. for a banquet in honor of F. H. Reed, Superintendent of the Station, and Mrs. Reed, who on June 30 celebrated their silver wedding anniversary.

After dinner the sixty-five members of Mr. and Mrs. Reed's family who were present enjoyed a number of bagpipe selections by Pipers Chas. Duthie, a Highland Fiddler, by James Gibson, violin and concertina numbers by Douglas Smith, two vocal solos by Arthur Raybould, and a vocal duet by little Margaret DeLong and Gladys DeLong.

Lacombe, 101 N.G., Mrs. Nellie Paulsen; V.G. Mrs. Elsie Kammerling; Ward, Mrs. E. Shaw; Cond. Mrs. Emily Mait; R.S.N.G., Miss Clara Douglas; L.S.N.G., Miss Mary Toward; Musician, Miss Opal Danner; Chaplain, Mrs. Beulah Buch; R.S.V.G., Mrs. Marjorie Brooks; L.S.V.G., Mrs. Frances Ruthven; I.G., Mrs. Ada Vaughan; O.G., O. E. Todd. Refreshments were served following the meeting and a pleasant social hour enjoyed.

Damages \$15,000 Awarded MacMillans

The MacMillan-Brownlee seduction case, which will go down in history as the most revolting in the courts of Canada, came to a close on Saturday evening.

Here is a report of the proceedings at the close of the MacMillan-Brownlee case:

Clerk of the court: Gentlemen of the jury, have you agreed on the answers to the questions submitted to you?

Jury: Yes, sir.

Clerk of the court: You say 'Yes' to question one: Did this defendant seduce the plaintiff, Vivian MacMillan?

Jury: Yes.

Clerk of the court: If so, when?

Jury: At the time stated by Vivian MacMillan.

Clerk of the court: If so, did she suffer damage?

Jury: Yes, \$10,000.

Clerk of the court: Question four: If there were seduction, did the male plaintiff suffer?

Jury: Yes, \$5,000.

Following this there were loud cheering in the corridors and thousands of citizens who jammed the street outside the court house greeted the verdict with salvo after salvo of cheers.

Installation of Rebekah Officers

Members of Alton, Mirror, and Red Deer Rebekah Lodges visited Lacombe Lodges on Monday night, June 25th, the occasion being the joint installation of officers of Sincerity No. 38, Alton and Lacombe 101, Lacombe, by D. J. Dugan, President, Wetaskiwin, and staff, as follows: Dep. Marshall, Mrs. Beulah Buch and Mrs. Andrews; Deputy Wardens, Mrs. Emily Mait; Deputy Secretary, Mrs. Mattie Reeves; Dep. Treasurer, Mrs. M. E. Todd; Dep. Chaplain, Miss Dora Shaw; Dep. Musician, Miss Opal Danner.

Mrs. Mable Pettit, Vice-President of the Rebekah Assembly was also present and briefly addressed the L.A.s, also complimenting the installing staff on the quality of their work.

Officers were installed as follows: Sincerity No. 38: N.G., Mrs. Elsie Borrell; V.G., Mrs. Mary Sanderson; Secretary, Dolores Brown; Warden, Mrs. L. Jones; Warden, Co. Celia Brown; Cond., Harriet Stone; R.S.N.G., C. Toepfer; L.S.N.G., Mrs. Jackfield; Musician, Mrs. A. Plisset; Chaplain, H. Olson; R.S.V.G., Mrs. E. Todd; L.S.V.G., J. B. Sheldy; I.G., E. Sheldy; O.G., B. E. Todd.

Lacombe, 101 N.G., Mrs. Nellie Paulsen; V.G. Mrs. Elsie Kammerling; Ward, Mrs. E. Shaw; Cond. Mrs. Emily Mait; R.S.N.G., Miss Clara Douglas; L.S.N.G., Miss Mary Toward; Musician, Miss Opal Danner; Chaplain, Mrs. Beulah Buch; R.S.V.G., Mrs. Marjorie Brooks; L.S.V.G., Mrs. Frances Ruthven; I.G., Mrs. Ada Vaughan; O.G., O. E. Todd. Refreshments were served following the meeting and a pleasant social hour enjoyed.

Judge Ives Does Not Like Verdict

Written judgment of Acting Chief Justice Ives in MacMillan-Brownlee case will be mailed to Clerk of the Court R. P. Wallace at the Edmonton courthouse on Calgary, the Journal was informed by the acting chief justice over the long distance telephone Monday. The judge announced disagreement with the jury award of \$10,000 to Vivian MacMillan and \$5,000 to her father and declined to enter the verdict.

"I do not know when it will be written," Mr. Justice Ives stated.

Brownlee Resigns

Here is a statement issued by Premier Brownlee Monday:

"I notified the lieutenant-governor on Saturday evening of my intention to resign as premier of the province.

"I requested him to allow me a few days to clean up any matters requiring my immediate attention and to enable my supporters to nominate a successor.

"This request was granted by his honor but it will be my endeavor to formally enter my resignation in the very near future.

"I have made no personal plans other than that I propose to remain in the province of Alberta."

From Rimbey and Points West

Rev. George D. Young, pastor of the United Church, left on July 2nd for Rimbey, where he will be in charge of the boys camp at Kasota Beach. Later in the season Mr. Young will be one of the leaders at the boys camp at Meridian Bay, Gull Lake.

Mrs. Don Friken, Mrs. Chester Rimbey, motored to Edmonton on Friday, for a few days visit with friends in the city. Mr. Friken and Mr. Rimbey expect to go to Edmonton on Tuesday where they will join the party and continue on a motor trip to Slave Lake and possibly to Peace River.

Mr. and Mrs. Walter Stevens are away on a month's holiday visiting Mr. Stevens parents and other relatives in Harmony, Minn., U.S.A.

The five month old daughter of Mr. and Mrs. Wm. Broderovon, of the Leduc district is in the Rimbey hospital seriously ill with pneumonia. Mrs. Broderovon's sister, Miss Dora Cannon, R.N., of Ottawa, is visiting at the Broderovon home.

Mr. John Hembury, of Lacombe, has been engaged as teacher of the Leduc school for the coming year.

The Misses Bernice and Lillian Auger left on Saturday for Toronto and other points east where they will spend their holidays. Upon their return they will resume their duties as teachers of the Woodville and Ross schools, respectively.

Miss Kathleen McNevin has resigned as teacher at the Centrevue school, and has accepted a similar position in the Lockhart district. Miss McNevin leaves on July 3rd for Edmonton where she will attend the summer session of the University.

Mr. and Mrs. E. George and two children, left on Thursday for a six weeks motor trip through the United States and Mexico.

At a meeting of the board of trustees on June 25th, the entire teaching staff was re-engaged for the coming school year at the same salaries and for the same positions. Miss E. Stuart, primary room; Miss J. Cook, junior intermediate; Mr. O. Manning, senior intermediate; Mr. J. W. Moseley, high school and principal.

Miss Jean Hayden, of Bentley, spent the weekend with relatives here.

Approximately fifty per cent of the wheat of this district is in the shot blade. Some damage is reported from hail which struck on Friday and Saturday. No storm, the hail could be seen east from town, for a distance of three miles. It had the appearance of snow covering the ground.

Mrs. W. A. Cotton Sr., accompanied by Miss Hester MacMillan of Waskasieu, Man., arrived on Thursday to spend the summer months with Mrs. Cotton's son, Mr. W. A. Cotton and Mrs. Cotton.

The Symonds, Centrevue and Chapel schools held a joint picnic at Cook's Point, on June 26th. Bathing, boating and land sports filled a pleasant day for the large crowd attending, but rain in the evening caught some of the late home-comingers.

Miss Frances Godfrey R.N., who for the past three months has been on the nursing staff of St. Paul's hospital, has resigned her position and left last week for Edmonton.

Miss Cochran of the office staff of Thompson and Dymac, Edmonton, returned to the city on Tuesday after a fortnight's holiday at the home of Mr. and Mrs. Alexander McNevin.

Indian Field Day at Ex. Station

About 100 Indians and their Agents and Farm Inspectors met at the Lacombe Experimental Farm on July 29. There were Stoney, from Winterton; Chief Sampson and a brother of Chief Siskin, from Hobbema; some from Sarcee Reserve, Calgary and some Blackfoots from Gleichen, a number of chiefs were among the visitors.

After the visitors had finished their dinner, under the shade trees on the Farm, P. H. Reed addressed them briefly before making a tour of the premises. He stated that this was the first Indian Field day but he hoped they would make it an annual affair. He did not see why they couldn't be just as good farmers as the white men and better than lots of them, for they had some of the best land in the country on their reserves. He explained that this farm dealt with mixed farming, while some of the others dealt with special crops or breeds of animals.

In speaking of the dry belt, he said, Pres. Roosevelt intends to plant a strip of trees 100 miles wide, in the Western States, from the Canadian border to the Mexican boundary and he advised them to plant shelter belts, preferably with Caragana. The Apary was first visited and then the Shoshone herd, where a demonstration was given showing a typical Best Shoshone, a Dual purpose type and a purebred Holstein. The speaker advised picking low-est, good type animals and supplementing the usual feeds with a good mineral mixture. He also mentioned a few ways and a manner of trimming were examined and methods of planning explained, different points of interest were visited and questions answered. The poultry yards and hog pens were also visited and the right type of bacon hog shown.

CLIVE NEWS

The Swedish Lutheran picnic, as usual, was well patronized, and all had a very enjoyable time. Dinner was served by the ladies from 12 until 2 p.m., after which a sale of fancy work was auctioned off by Mr. Haskins, and a draw for three prizes. Miss Beresford winning a beautiful settee for 1st prize, Mrs. Will and Mrs. Dean, third. Then followed sports for both young and old, which caused much fun. The rest of the day was taken up with a ball game between Nebraska and Waskasieu, the latter winning by 26 to 3.

Mrs. Banton Billingshurst is visiting with her sister, Mrs. Gibney, of Sarcee Mission, for a couple of weeks.

The frost Saturday night nipped quite a lot of gardens in the surrounding district. A good rain and some warmer weather would help things considerably here.

Our local postmaster, Mr. Coote, accompanied by his wife and son, Milton, are on a two month's vacation in the East.

Regular meeting of Women's Institute for July 7th is postponed until Saturday, Aug. 4th.

Stampede Winners

A large crowd was attracted to the Lacombe stampede held here Wednesday. The races were very interesting, marred, however, by the fatal accident to Cecil Doran, who was thrown from his horse, and injured at the base of his skull.

In the half-mile race, Jim Ross of Elmore, won; Scotty Cameron, also of Elmore, won in the mile race. The quarter mile race was won by George McLaren, Ponoka, with Steers of Ponoka, second, and Jim Ross, third. The Roman race was won by Jim Ross, with George McKiddie, Ponoka, second. Scotty Cameron won the chuck race, with Tom Leander.

In harness racing, Walter Armstrong, Cochrane, was first, Ed. Reed, Lacombe, second, and C. Tompkins, Chesterwold, third.

In the saddle race, Lawrence Watkins, High River, was first, C. Patterson, Gladys, second, and L. Bruce, Donald, third with S. Watkins, High River, for third.

BAND CONCERT AND DANCE JULY 29

The Lacombe District Band will present a high class concert of band music, assisted by local artists, followed by a dance, in Lincoln Hall, Friday, July 29, at 8:30 p.m. Everybody come for an enjoyable evening and a good time. Admission Adults 5c.; Children Free. Dance 25c.; Genls. Supper Free.

WORLD HAPPENINGS
BRIEFLY TOLD

Holland is reported to be concerned over the intensive trade invasion by Japan of the Dutch East Indies.

The oldest continuously published newspaper in Canada, The Montreal Gazette, recently celebrated its 150th birthday. Its first issue appeared June 3, 1778.

The calling of an imperial conference for the creation of an Empire air force will shortly be suggested by Lord Elinank in the House of Lords, it was learned.

Belgium may pay her 1934 war debt instalment to the United States with a \$10,000,000 shipment of radium, according to an unconfirmed report at Brussels.

John L. Beckwith, former mayor of Victoria, and resident of British Columbia since 1884, died recently. He had engaged in the salmon canning business for 31 years. He was born in Cornwallis, N.S.

Wiley Post, round-the-world flyer now tuning up his plane for the London-to-Melbourne \$750,000 air derby in October, recently announced he also has his eye on the world's altitude record.

The German version of the motion picture, "The Trial of Mary Dugan," was banned from theatres of the reich because it was regarded as a plea against capital punishment, it was learned. As such it was contrary to Nazi principles of law enforcement, it was explained.

The British House of Commons approved repeal of the duty on insulin, diabetes remedy discovered in Toronto by Sir Frederick Banting who was knighted in the King's birthday honors list. During debate on the move congratulatory references were made to Sir Frederick.

Two-and-a-half million feet of lumber will be shipped over the Hudson Bay Railway and through the port of Churchill in northern Manitoba to Great Britain by The Pas Lumber Company of The Pas, Man., according to D. S. Rosenberg, secretary-manager of the company at Prince Albert.

Train Run By Electric Eye

Invention Tested By German State Railways May Be Adopted

Trains in Germany will be operated by an electric eye if an invention recently tested by the German State Railways is adopted. Control of a train is through photo-electric cells which operate the brakes by means of a light signal, but the light itself is provided by the engine. A dynamo on the locomotive feeds a lamp which throws an almost vertical cone of light into the air. Mirrors are arranged on upright supports at points along the line, and if the signal is against the train the mirrors will be in such a position as to meet the beam of light and throw it down on a pair of photo-cells mounted in the searchlight of the engine. The electric current from the cells operates a relay, and the brake magnets are opened and the train is brought to a standstill. The speed of the train can be automatically adjusted.

Fashion Show In Russia

Latest Paris Creations Shown To Thousands Of Women

The Dress and Lingerie Trust of Soviet Russia has just completed its first fashion show. Forty thousand women came from all over the country to gaze with critical admiration at 150 models, derived from the latest Paris creations. What further proof is needed that the Revolution is dead? The exhibition may be even more significant than recognition by the United States. It may mark a turning-point in the history of the Soviet. True, the frills and frumpiness of M. Jean Patou were "modified" to suit Soviet women, but it was just as much a fashion show as if it had been held in the Fifth Avenue salon—Washington Post.

Not American Innovation

The London Daily Telegraph says an invitation card, sent out by the Duke of Wellington, at the exhibition in the Royal Albert Memorial Museum, is a reminder that the dropping of the "u" in such words as "honour" and "labour" is not an American innovation. Like so many Americanisms it has Anglo-Saxon antecedents. The card asks for the "honour" of the company of Lieutenant-Governor Sir James Macdonnell at the dinner given by the Duke to celebrate the anniversary of Waterloo.

Railway Workers Musical

More than 2,500 railway workers took part recently in a musical festival in Reading, England. They came from all parts of England and Wales, and the contests were held in four weeks. Poems were submitted by a dock foreman, a litter, a shunter and a tubs cleaner. In the choral solo class there were heard the voices of a wheel tapper, a lampman and a clerk.

A world shortage of antiques is reported. This is in spite of the fact that many factories are working overtime to keep up with the demand.

W. N. U. 2060

Woman Crown Attorney

Lady Lawyer Holds Responsible Post In British Guiana

When William Nedd, ex-postman, faced the charge of larceny of postal packets, the property of the British Guiana postmaster-general, it was a woman, Miss Iris de Freitas, B.C.L., who prosecuted on behalf of the crown. Nedd was sentenced to two years hard labor.

The talk of the Demerara assembly was the appearance of this remarkable lady lawyer, British Guiana's first and only woman in the exciting role of crown prosecutor.

She is the first woman in the West Indies and probably the first woman in the Colonial Empire to be given such an important post.

Miss de Freitas absolutely refuted the conscientious bachelor's suggestion that "Woman's place is still in the home." She is quite at home in the courts.

A modest, petite woman, her love of study lured her into pursuing legal honors.

Called to the bar at Georgetown, British Guiana in 1932, she won her spurs at the October sessions when she successfully defended the accused in a murder trial. She scored another personal triumph when she appeared for the crown at the full court of appeal. She is secretary to the franchise commission and legal assistant in the attorney-general's chambers.

Air Mail Service In Britain

Establishment Of Regular Service For Summer Months

For the first time in British aviation history, ordinary mails were carried by air when the new air mail service between Inverness and Kirkwall, linking the far north of Scotland, was inaugurated.

Sir Frederick Williamson, director of postal services, at a luncheon in Inverness, pointed out establishment of the regular service for six summer months marked a great step in the internal air mail development now beginning, alongside railway and shipping as a regular agent for carriage of mails.

INTRIGUING NECKLINE—SMART COOL SLEEVES LINES THAT SLENDERIZE THE HEAVIER FIGURE

To-day's model is just perfect for hot weather wear.

Besides being unbelievably easy to make, it's surprisingly inexpensive. The pattern includes clear instructions as how to cut it out and put it together. The scalloped treatment is optional. The pattern also provides for the neckline, sleeves and hips to be cut with a straight edge.

Carry it out as the original in a handkerchief-finish lawn print in blue or grey ground—you'll love it. The white organdy vest gives it a dainty touch.

Strip! a seersucker can be worked out very effectively in this model.

Two sizes in white and pastels are charming too.

Style No. 867 is designed for sizes 36, 38, 40, 42, 44, 46, 48 and 50 inches bust. Size 36 requires 3 1/2 yards of 36-inch material with 3/4 yard of 36-inch contrasting and 4 1/2 yards of binding.

Price of pattern 20 cents in stamps (coin value is preferred). Wrap plain carefully.

"STRAIGHT AS A DIE"

Our picture shows the wonderful regularity which the Royal Air Force detachment presents as the men rehearse their famous massed drill in preparation for the Royal Tournament at Olympia. The photograph was taken at the Royal Air Force School of Physical Training at Uxbridge, England.

There has been much talk of the high cost of medical service and the advisability of adopting the Chinese system of payment only when in good health. Much of the criticism has been directed against the practicing physician, and this is eminently unjust.

The physician would be only too happy to practice under such a system; that is, to be retained by the year directly by the family, even as corporation lawyers are. It would be a double blessing, assuring the doctor of a definite income and guaranteeing to the patient the doctor's best efforts to keep him well. In addition, when the patient did get sick, the doctor would feel free to treat, call and see the patient as often as he would desire without the fear on the part of the patient that a bill was being run up.

The fault is not with the physician but with the public. People will pay for medical attention when they are forced to do so by sickness, but they will not pay when in good health. The doctor has always been the first to preach preventive medicine. The county medical societies have urged periodical health examinations to prevent the development of disease. But has the public heeded the call? Even now Dr. John L. Rice, Commissioner of Health, is broadcasting a warning to parents to prevent diphtheria by having a toxin injected into the child when the child is well. Physicians are giving their full-hearted support to this appeal.

But is the public answering it? Medicine is a great and glorious profession, and it is only the monetary side of it which is unpleasant. Retain your physician by the year, let him practice free and unhampered by money worries and then the doctor will truly glory in his profession.

It takes lots longer to prepare for peace than to prepare for war.

A Chicago skyscraper is to be completely air conditioned.

How strange is man! He wouldn't steal a dime of your money, but he would steal a dollar's worth of time.

Not Sound Economy

Eliminating disease has done more to increase material prosperity than any other one thing, declared Dr. Gordon Bates, of Toronto, general director of the Canadian Social Hygiene Council, in an address in Ottawa. But even today, two per cent of the population was constantly ill, representing 160,000 adults in Canada. Parsimony in the expenditure of public funds for public health was unsound economy, maintained the doctor. The administering of toxic children who were well would prevent diphtheria. Compulsory pasteurization of milk was another preventative that should be insisted upon in the interests of national health.

His Trainer's Voice

In Brooklyn when Ringling Circus' black bear Bruno found his cage unlocked, he strolled up a fire escape to see the town, a riot squad at his heels. Stopping halfway up Bruno looked at the police; the police looked at Bruno. Up floated the voice of Trainer Joe Meyers: "Hey, you! What are you doing up there?" Bruno peered down at Meyers, padded back down between respectful rows of police to his cage.

New Elevated System

A three-deck elevated system that would accommodate express and local street cars, allow airplanes to land and take off, and eliminate poles and wires, has been invented by A. L. Rowe, of Detroit, Mich. The elevated stands 40 feet from the street, is 20 feet wide at station stops and 18 feet between stations.

The European house cricket which is an annoyance in certain urban areas in southern Ontario is established in Ottawa, occasionally infesting dwellings, particularly furnace basements.

In many parts of Germany the apple is deemed potent against war.

Think Credit For Introducing Golf Should Go To Natives

The latest development in discovery of Indian relics around the Chaplin area, west of Moose Jaw on the C.P.R. main line is a ball of some sort of rock, light yellow in color, and smaller than a billiard ball. It is approximately the size of a billiard ball and was found by a member of the Reichert family on whose farm many arrow heads and other Indian relics have been located. Queries are being bandied about in Chaplin as to whether the credit for introducing golf should go to the Indians rather than to the Scots. Nothing resembling a golf club has been found as yet so maybe it was marbles or bowls that the original prairie denizens enjoyed in their spare time.

Little Journeys In Science

HELIUM

(By Gordon H. Quast, M.A.)

It is a very interesting fact that scientists observed a new element in the sun long before it was discovered on the earth. This new gas was given the name helium, from the Greek word "helios," meaning the sun. It was detected in the sun by means of the spectroscope, an instrument which the scientist uses to determine what elements are present in any light-giving body.

This gas occurs only in very small amounts in the air, but it is found in larger amounts (as much as one per cent) in the natural gas of Texas, Kansas and Alberta. It is about seven times lighter than air and hence is used for inflating balloons and dirigibles. It will not burn and is no safer than hydrogen, which is a very inflammable gas. Helium is obtained from natural gas by freezing out or liquefaction of the combustible gases. At Calgary, Alberta, are located such plants, each of which can liquefy 60,000 cubic feet of gas per hour. The helium is taken out and the gases are then returned to the city mains.

Engineers have recently found an important use for this gas. Men obliged to work in compressed air, as in caissons under water in tunnel construction, often collapse when brought too quickly into air at ordinary pressure. This is because the nitrogen of the air dissolves under pressure in the blood, tissues, and even in the spinal cord. When the pressure is released, this nitrogen escapes in bubbles, which may destroy the spinal cord, affect the brain, interfere with the action of the lungs, and even cause death. This limits the depths to which divers may go down with safety. Helium is much less soluble than nitrogen and diffuses more rapidly, so that if the locks where the air pressure is reduced are filled with helium and oxygen instead of air, which is a mixture of nitrogen and oxygen, the danger is removed.

Was Greatly Concerned

King George Anxious About Crew In Tank Demonstration

A war story about the King is told for the first time in "Three Lives—Autobiography" by Major S. Foot, D.S.O.

Just before the Battle of Cambrai 20 tanks gave a demonstration to the King of what they could do. One of them dropped ten feet over a bank and landed with a crash on some concrete. The tank stopped. It looked certain that the crew must be injured.

Although the demonstration was being given only just behind the lines, the King, casting caution aside, ran up to the motionless tank and hammered on the door with his fists shouting out to ask if the men were all right.

In answer to the King's hammering a door opened and the crew stepped out. Last of all came a young second lieutenant who had been driving himself. "No one was hurt and the King insisted on shaking hands with all of them, grimy as they were," the story goes.

Eliminate Scarlet Fever

Scarlet fever has been eliminated from the Toronto hospital for sick children through immunization measures.

Dr. Beverley Hainah, of the hospital staff, reported to the Ontario Medical Association.

Results of prevention and control had been under investigation in the hospital for nine years, he said, and it had been shown that the disease could be eliminated not only from the wards but from the nursing staff, physicians and attendants.

Demand for a decisive decision on whether doctors should protect each other in cases of mistaken diagnosis came from many physicians at a round table conference. No definite action was taken and the question is to be considered by the executive.

The particular question debated was whether Amstrong should protect a physician when upon operating he discovered the diagnosis to be wrong.

"Never let us run down the other fellow's diagnosis and treatment," was the verdict of the committee on later relations, presented by Dr. K. A. Gillie, Fort William. "How often has it happened," the report continued, "that patients have come to us with incomplete and distorted (often intentionally) statements supposed to have been made by a doctor at a previous consultation?"

"It is a popular misconception with the laity that no matter what a doctor does the other doctors will back him up and that they have very little chance for redress, even in cases of flagrant malpractice. We ourselves are to blame for this attitude but the physician or surgeon should not be penalized for his honest mistakes."

Controlled By Sound

Science Has Provided Paralyzed Boy With Electric Hands

Science has provided "hands" for a 14-year-old boy, paralyzed from the neck down. Photo-electric cells and electric sound control are utilized. The apparatus, devised by James S. Doyle, a New York engineer, was demonstrated at the Reconstructing hospital, where the boy is a patient.

able to move his head, the boy can interrupt one or two light beams above his bed and thus create power with which he can use his hands to turn pages of a book or switch a radio. A photo-electric cell is arranged with the light beams.

Other mechanisms enable him to perform different tasks with his hands merely by making a sound, blowing his breath or touching a sensitive rod with the tip of his tongue.

Each of these actions puts apparatus in operation which gives power to his hands. Hospital officials predict wide usage of the devices, which they say are not costly.

A Remarkable Pilgrim

Woman Walked Twelve Times From Oberammergau To Rome

With the death at Oberammergau of Catherine Kopp, the most remarkable pilgrim in modern times has passed away. Of peasant stock, she lived to be eighty-four, and made, on foot, twelve pilgrimages to Rome. She knew three Popes and had planned another pilgrimage for this spring. Each journey involved walking over 1,500 miles. On reaching Rome she went straight to St. Peter's to pray at the Apostle's tomb. On one occasion she started on her homeward walk an hour after the late Pope Pius X. had received her. She made her first pilgrimage when she had passed her seventeenth birthday.

Agricultural Notes

Many Items Of Interest To The Western Farmer

While strawberries, like other fruits, are grown successfully on the prairies, they are not produced in commercial volumes.

Sulphur has proved to be one of the most effective fungicides for the control of diseases caused by rust fungi.

Sales of hogs to stock yards and plant for the four months ended April 30 were approximately 19,000 more than for the corresponding period last year.

Of the clovers in 1933, red clover seed yielded particularly well in central and western Ontario, and this raised the total production in Canada above normal.

The basic reasons for the urge to form co-operative fruit associations in California during the past 30 odd years have been low prices to growers.

Shipments of livestock from Western to Eastern Canada for the first four months this year included 29,267 cattle; 164 calves; 82,908 hogs, and 48,423 sheep—all increases except hogs compared with last year.

In spite of the heavy decrease in Canadian exports of wheat to France in the past two years, this commodity still accounted for 81.56 per cent of Canadian total sales to France in 1933.

The total value of the 1933 timothy seed crop is estimated at \$15,000 as compared with \$225,000 for the 1932 crop. The selling price per cent for the 1933 crop was about 4 1/2 cents as compared with 5 1/2 cents in 1932.

Grading and inspection of honey when exported are compulsory under the terms of the new Fruit and Honey Act. Honey, when shipped from one province to another, must also be graded but inspection is optional except for administrative purposes.

The increase in the sales of branded beef in Canada for the first four months of this year was considerably more than two million pounds compared with the corresponding period of last year; namely, 12,209,556 pounds this year; 10,167,515 pounds last year.

One factor which is favourable to the consumption of Canadian and other Empire tobacco in the United Kingdom is the decision of the United States government to restrict tobacco acreage and to force leaf prices to a more economic level by increasing the price to smokers.

Air-dried peat and muck will absorb 2 to 6 times their weight of liquid, and in this respect are very favourably with straw, the bedding material almost universally used on the farm. Peat moss, commonly known as moss litter, may absorb ten to fifteen times its own weight of liquid.

The government of Canada, first appointed an official entomologist in 1934, but the real development and expansion of the work did not begin until about 1909 when the finding of the dreaded brown tick moth in shipments of nursery stock from France necessitated the setting up of the section in 1910, giving the government power to inspect plant products entering Canada, and to take steps to prevent the spread of insect pests already prevalent in the Dominion.

YOU'VE HAD BETTER LUCK WITH OCCASIONAL WIFE

By EDNA ROBB WEBSTER
Author of "Joretta," "Lipstick Girl," etc.

SYNOPSIS
Camilla, Roy, and Peter Amos, young and in love, marry secretly, deciding to live their own lives apart until Peter is able to provide for his family. Peter is a young, struggling sculptor trying to win a competition for a scholarship abroad and Camilla is the adopted daughter of a wealthy family. She is not to inherit money until Peter is able to provide for his family. She is studying commercial art in the hope of landing an agency job. Others in the story are Roy, another wealthy family who is trying to win Peter, Sylvia Todd, Peter's model, and Gus Matson, Camilla's former roommate with whom he has quarrelled. After a party at an exclusive club, when the rest of the members of the party go to a cabaret to continue the party, Peter and Camilla slip off to the beach by themselves and fall asleep on the sand. When they awake it is early morning and Roy and another boy are standing near them. This makes it necessary for Camilla to announce before the party that she and Peter are married. Camilla urges Peter to accept some of her earnings to help him along, but Peter refuses and they quarrel. After Camilla has gone from the studio, Roy Wertz calls and persuades Peter to accept a loan of \$1,000. Peter takes his exhibit and asks Roy and Camilla for suggestions as to a name for it. Camilla suggests "Eager Youth," and Roy suggests "Inspiration." Peter adopts the latter title and Camilla, heartbroken goes to Peter's studio for quiet. Roy tells Peter and Roy and Roy later, and as the lights are turned on, see the statue has been shattered to pieces. Roy accuses Camilla of doing this, and Camilla, stunned by the disaster, and hurt and horrified by the accusation, faints.

(Now Go On With The Story)

CHAPTER XLV
The three exclamations over the discovery were almost as one breath, but the reactions of the trio were as different as the three individuals. Peter sprang toward the scattered pieces of plaster and sank down to his knees with a groan like a great building collapsing in an earthquake. Roy's expression of horror changed suddenly to angry accusation as he turned to Camilla, who glanced perplexedly from Peter to Roy, and was on her knees beside Peter in an instant.

Their hands fumbled futilely with fragments of plaster as if they would fit them together again; then they faced each other desolately. For a moment they seemed to be paralyzed with the horror of this unbelievable catastrophe.

Finally Camilla faltered, "Oh, Peter darling!"

Anger flamed in his eyes; just as Roy demanded in a shrill voice, "How could you?"

Camilla looked wildly from one to the other. "How could who?" her dry lips whispered.

"You!" accused Roy. "You did it! Camilla put up a protesting hand to push back the first which leaped from Peter's eyes upon her, the room swayed and she sank down, down into a deep black abyss. Above her she heard voices, faintly clamoring, footsteps that resolved into stampeding thrush, confusion, that seemed to pass over her head and trample her into oblivion.

Voices, sounds, rushed back to her from a void. "Where was she?" "What had happened?" She tried to raise her hand, but it would not move, it was too great a effort to open her eyes.

"Her muffled words reached into distinct words. Ah! Yes, she remembered. They had found Peter's statue destroyed and somehow, it had

been too much for her. Her thoughts slipped away again. Then a girl's voice—it was Avis—declared angrily. "Of course she did it! I told you!" That was it. Avis had accused her of destroying Peter's precious work, and Peter—Peter had looked at her as if he believed it. Peter's angry, reproachful, accusing eyes had added their pain to her first shock over the discovery, until she couldn't bear it. It was all so horrible. Why couldn't she have kept her senses and defended herself against them? Why had they accused her, she wondered for a bewildered second. Oh, yes, she had been alone in Peter's room, alone in the dark, when he and Avis came in and discovered the broken figure.

She moved her hands protestingly, opened her eyes. Camilla was bending over her. "Terry was beside her," she said, "but he didn't see anything. Just let her rest. Don't try to talk to her."

Camilla was grateful for that advice. She wished they all would leave, and decided to be very quiet until they did. But just then she began to sob unsteadily. "Tried desperately to stop, and could not."

"She's all right now," Camilla pronounced. "Leave her alone. She can't help crying. That's the way you come out of a faint like that—either laughing hysterically or crying. Let's all get out of here. There, honey," she stroked Camilla's hand. "Take it easy now, and don't try to leave here tonight." Camilla's voice was gentle with sympathy, but edged with resentment when she spoke to the others, and managed to persuade them all to leave.

Finally the door closed after them and left a heavy silence which expanded and filled the room. Camilla was quiet now, her eyes closed. She lay rigidly for some time, wondering if she were entirely alone. Someone stirred across the room, came toward her where she lay on the couch. She opened her eyes. It was Peter. Her heart ached when she saw how haggard and pale his face was.

He asked quietly, in a hollow voice, "All right?"

She nodded, and slow tears rolled weakly down over her temples. She could not stop them. She held her hand toward him, appealingly, and whispered, "You don't think—I did it, Peter?"

He did not touch her, drew his hand across his eyes, wearily. "I can't think. What's the use, anyway? It's done."

"But, darling Peter," she insisted desperately, "surely you can't believe I would do that to you?"

"Of course not," he replied quietly, as if what he believed was of little consequence. He was stunned, grieved, angered, puzzled. Accusing anyone, or thinking anything, made no difference.

The thing on which he had labored and agonized for weeks, his possible opportunity for the Paris scholarship, his whole ambition, it seemed now—all this someone had destroyed in one mad moment. Who, how or why was of no importance.

It had been Avis who insisted that Camilla did it for revenge for his neglect of her and attention to Roy. No one else had agreed, but everything had been so confused, it didn't seem plausible that anyone could have done the thing, even if she were justified. Still—someone had to do it—they had found her alone in the darkened room—but what did it matter, now?

He dropped listlessly into a chair beside her, covered his face with his big shaggy hands. There was a long silence, while their thoughts moved in relentless circles, always back to the same unalterable tragedy.

Camilla sat up slowly, straightened her hair and rumpled clothes. Peter looked up inquiringly.

"I must go home," she said wearily.

"You are in no condition to go anywhere," he protested. "Here, let me help you get your dress off, so you can rest. You are going to stay here with me, tonight?"

"But you don't want me to."

"Sure I do. Why not? Naturally, I don't feel very jolly over everything. Besides, I shouldn't let you go home. You are going to be much better if you stayed here."

There seemed to be nothing else she could do. Under any other circumstances, she would have stayed gladly, to try to comfort him in his grief and disappointment. He had said he did not believe she was guilty but there was that horrible weight of injustice that dragged at her heart and made it so difficult for her to say or do anything. As Peter had said, it was done, and no condemnation could change it. He could believe she was guilty, and still deny it. It made no difference to him.

The guests had gone, excited, in the traffic event of the evening, protesting, her verdict. Avis was alone, as horrified as anyone involved in the traffic event of the evening. It wasn't just Peter's acquittal, and his ambitions that were shattered, which had pre-eminence in her thoughts. What most appalled her was the sudden shattering of her own hopes and ambitions, which her clever management had promised success. She had proceeded cautiously, tactfully, with her influences over Peter. Everything had gone beautifully until this evening. His sympathies gradually swerving in her favor, his criticisms of Camilla increasing gradually, his obligations

for DANDRUFF
Minard's
"KING OF PAIN"
LINIMENT

and gratitude to her becoming more involved, his success imminent, his temporary separation from Camilla all but accomplished.

Had she been too bold in her confidence? Had she flattered her power over Peter too soon, and Camilla had taken it all too much? There could be no other explanation. Her grief was a mixture of defeat and anger. She was cornered, no way out now. Still—if Peter were made to believe that Camilla had done this despicable thing to him, it was the end for her. He never would accept for his wife the woman who had deliberately ruined his first chance toward success. Perhaps, after all, she still held the winning hand.

She wondered what might be going on now behind that other closed door. Poor Peter was so stunned and grieved that he couldn't even think yet. And with Camilla just recovering—could that faint have been pored to favor her innocence?—very little probably would be said by either of them to-night. But she was glad that she had planted that little seed of suspicion at the first moment—the only time that would have been opportune for it. She could not have waited until tomorrow and calmly told Peter that she suspected Camilla. Impulsively, naturally, in such circumstances, she had spoken his first thought that came to her mind. What explanation was more plausible?

She opened her door into the hall, stealthily, and listened. No sounds from Peter's room. She closed the door again and resignedly prepared for the night. There was nothing else for her to do.

Errors Of Artists

Expert Critics Find Many Mistakes That Are Abused
An artist invited his neighbour, a market-gardener, into his studio, and, putting in front of a large canvas, said: "How do you like this picture of Adam and Eve?"

The visitor studied it intently for a few minutes.

"Very much," he said at last, "but—"

"Well, what?" inquired the artist, "nothing particular," was the reply, "only you've placed in Eve's hand a variety of apple which has only been produced during the last twenty years."

The expert is always a harsh critic. Every year the tailoring press criticizes the blunders of R.A.'s, but if time could be reversed what would the ancient Egyptians say to Pharaoh's daughter and her maids of honour, in "The Finding of Moses," attired in the latest "confections" of the First Empire of France?

Perhaps it is not often that a farmer turns into Burlington House to see the Royal Academy pictures of the year, but it is on record that on one of these rare occasions the jolly farmer stood before a large picture of the Flood, when he was represented, "feeding Noah."

There were a dozen of them, all gobbling out of a long trough, and the farmer went into fits of laughter.

"Well, I'll be hanged!" he spluttered to another bystander, "did you ever see a lot of pigs feeding and not one of them with its feet in the trough?"

As with novellists, the moon has been a source of trouble to artists. One of them recently painted a crescent moon in the sky, and the purchaser, opposite the setting sun—an astronomical absurdity. Yet he refused to alter it when the error was pointed out, saying that to place the moon anywhere else would ruin the balance of his picture.

Probably few observers would have noticed that a famous artist had painted a rainbow in the reverse order of the spectrum. The picture was purchased from the walls of the R.A. exhibition, no critic having noticed the error, and the purchaser lived in ignorance of it until it was pointed out by a scientific friend. The rainbow was upside down.

Guns are a prolific source of artists' howlers. One of the older ones shows the escaping Israelites marching toward the door of the Red Sea with muskets on their shoulders, and a seventeenth-century carving of exquisite workmanship shows the Good Samaritan on the Jericho road, one of his servants carrying a gun.

Spanish artists show Abraham about to shoot his son Isaac, with a pistol in place of using the scriptural knife.

Find White Coral Reef

Chicago Geology Students Report Discovery In Lake Michigan
Lake Michigan's water level was uncommonly low in a recent week. Trooping along the shore near Chicago, a group of geology students from Central Y.M.C.A. College of Arts and Science were so surprised to see parts of a submerged reef well known to chartmakers jutting a few inches above water that they wasted out to chop off samples. What they brought back their specimens to Instructor James H. Glasgow, University of Chicago graduate student, he stared at the stuff, decided it was white coral, sent it to university geologists who confirmed his opinion.

They were sent to survey Lake Michigan's coral reef. It parallels the shore for 1,500 feet, is flat on top, evidently shaved off by Pleistocene glaciers. Mr. Glasgow was credited to the Silurian period—400,000,000 years ago.

At that time the U. S. Midwest was covered by a broad bay of the ocean reaching up from what is now Central America, as numerous marine fossils found in the region testify. Lake Michigan's coral is the farthest north ever found.—From Time

Toll Of World War

Figures Relating To Dead And Missing Hard To Grasp
How many Lusatians would have to go down to carry all the dead and missing soldiers and the dead civilians of the great World War? One Lusatian a day for 70 years, or one a week, beginning nearly a century before the discovery of America by Columbus and continuing to the present hour. That is the number of Lusatians that would be required to carry the dead. The dead of all nations who died in the war.—From Liberty

Hen Lays Big Egg

Cackling disdain at a boastful Ontario chicken, William Major's Rhode Island hen, it was known, "Que," laid an egg weighing 5½ ounces with circumferential measurements of 9½ inches and 7½ inches. A few days ago a hen owned by J. H. Boyd, Metcalf, Ont., made quite a noise about an egg weighing 4½ ounces, with measurements of 8½ inches and 6½ inches.

If the labor leader's pay stopped when yours did, you wouldn't be urged to strike very often, says the Brandon Sun.

MAKES FALSE TEETH FEEL LIKE NATURAL

There must be a reason Dr. Wrenett's Powder is the world's largest seller and prescribed by leading dentists. It holds teeth so firmly—they fit so comfortably—that all day long you forget you ever had false plates. Leaves no colored, gummy paste—keeps mouth sanitary, breath pleasant—the best powder you can buy yet cost is small—any drugstore.

The Ingenious Asiatic

Japanese Are Great Imitators And Stop At Nothing
Everybody knows that the Japanese are a wonderful people, but few of us understand just how wonderful they really are. Every day brings new proof. Virginia tobacco growers, according to a Times dispatch from Danville, are greatly disturbed by the threat of an imitation Virginia cigarette made from native Japanese tobacco and flavored with a German extract from cheap Virginia leaf.

The ingenious little Asiatic people who can imitate foreign electric bulbs and bicycles and gramophones are now imitating Nature's work in our Piedmont tobacco fields.

Where will they stop? The prevalent impression is that they will stop at nothing. Universal unemployment threatens the nation because the Japanese will soon be making all the Grand Rapids furniture in the world, and all the Detroit automobiles, and all the Swiss cheese, and British Southdown mutton, and French champagne, and Mexican tamales, and Brazilian coffee, and Australian wool.

In every industrial trouble anywhere in the world to-day the motto is "Cherchez le Japonais." From the size of the Japanese "menace" there must be about 800 million Japanese and each one of them must be as clever as a thousand devils—New York Times.

Probably few observers would have noticed that a famous artist had painted a rainbow in the reverse order of the spectrum. The picture was purchased from the walls of the R.A. exhibition, no critic having noticed the error, and the purchaser lived in ignorance of it until it was pointed out by a scientific friend. The rainbow was upside down.

Electric Light For Lhasa

British Firm Permitted To Do Work In "Forbidden City"

Lhasa, the forbidden—and forbidden—city of Tibet will shortly be lighted by electricity. English materials, and English workmen, who are used to going into remote and backward parts of the world with civilising machinery, are going to Lhasa to carry out the job.

The transportation of the equipment will be one of the most difficult tasks ever undertaken by a British firm. Hundreds of tons of material and machinery will have to be carried over 400 miles of some of the most mountainous and almost trackless terrain in the world by mules and porters, aided in some places by yaks which are the only animals that can live at an altitude of 17,000 feet over which the caravan will have to go. More than 2,000 cases will be used to transport the material, which will then be assembled and set up in Lhasa.

The forbidden city is not quite so forbidden as it was recently, but it must have given the monks who rule the city of 30,000 people much misgiving before they gave consent to a British firm to do this work. Probably it took years of persuasion to obtain that consent. Lhasa is the most priest-ridden city in the world, and the lamas are opposed to modernization, their rule being built on a fabric of superstition.

No white man ever visited the place until an Englishman named Thomas Manning found his way there in 1811, and no other man ever reached there until the British sent an expedition in 1904. Since then only comparatively few have penetrated the fastness, and even to-day it is a city of dirt and squalor, utterly without modern conveniences. This may be the first step in the modernization of Lhasa.—St. Thomas Times-Journal.

Forgotten By Time

Lost Race Of Primitive Savages Found On Pacific Island
Mrs. Zita Baker, a young British woman, has returned to England stricken with malaria after spending four enduring months among a "lost race" of savages.

Mrs. Baker is the wife of Dr. John R. Baker, of Oxford, leader of a scientific expedition sent out to the New Hebrides, in the Pacific, by the Oxford University Exploration Club.

"Some of the islands," said Mrs. Baker, "have been explored by white men. The natives were among the most primitive aborigines—a race forgotten by time. I used to go out with the women to cultivate the fields in the daytime. At night I slept with them in their huts. Often there would be as many as eight women to one hut."

"Firearms were unknown on the island, and the men had to hunt with bows and arrows."

Latest Thing In Elevators

Works Perfectly Without Any Direction From Human Hand
The latest thing in elevators arrives at your floor in response to your signal; opens its doors, closes them; goes about its business of collecting passengers at other floors, repeatedly opening its doors and closing them; repeatedly stopping, starting—all without direction from human hand. If you happen to feel it, it's an interesting sensation to find yourself in the hands and apparently at the mercy of a giant, without conscience, pity, or any regard for its human charges. But if no appeal is possible, neither is there cause for complaint. And after a few trips you consign yourself to the machine without a qualm, serene in the realization that it is not robots, are Frankenstein.—Christian Science Monitor.

Supplied The Material

Toronto Woman Used Gold In Wedding Ring For Filling
A well-known Toronto dentist the other day had a lady come in to have a gold filling put in her tooth. "If I like to supply the gold," says the lady. "Well, we don't as a rule," he began. "Oh, but I really want to supply this gold," she says winningly. He gives in and goes ahead with the mold. Next day she trots in with a wedding ring.

"It's only 14 carat and we usually use about 22," he explains. But she gets her point. "I'm going to be married tomorrow again," expands the lady. "This is my first wedding ring, and if I have it in my tooth, I can still wear it without my second husband knowing anything about it." The dentist soaked the yellow metal home.

New Limer Launched

Buttons pressed simultaneously at Pretoria and The Hague launched the liner Pretoria, from a shipway in Holland. The buttons were pressed by Premier Jan Hertzog of South Africa and Dr. Hendrikus Colijn, premier of the Netherlands. The new 17,000-ton liner will sail between Holland and South Africa.

One of San Francisco's municipal courts sets aside three days a week as Chinese days, on those days all defendants in the court are Chinese.

It takes a woman of decision to become a decided blond.

ARM IN SLING WITH NEURITIS

A "token of gratification" this woman says she is giving when she writes of her relief from neuritis. "For twelve months I have had neuritis in my arm, and up till the last two weeks have had to carry it in a sling. Since then I have abandoned my sling, am able to sleep undisturbed, and can perform household duties that previously I would not have done. These benefits I have received from Kruschen Salt. This has all happened in two weeks, and I am optimistic enough to think that in another month I shall have said good-bye to neuritis once and for all. Call this a testimonial if you choose, to me it is a token of gratification." (Mrs.) N. E. L.

Neuritis is a result of impurities in the blood. And it is impurities circulating all over the system and setting up inflammation in the tissues, that causes these excruciating pains. Kruschen Salt can be safely trusted to set the matter right. Because Kruschen contains just what Nature needs to persuade your internal organs back into a healthy, normal condition.

Little Helps For This Week

"For thus saith the high and lofty One that inhabiteth eternity, whose name is Holy: I dwell in the high and holy place with him also that is of a humble and contrite spirit, to revive the spirit of the humble, and to revive the heart of the contrite ones." Isaiah 57:15.

MORNINGSIDES NEWS

A joint meeting of the Morningside W.M.B. and the Fairview Ladies' Aid was held in the Church last Thursday afternoon. President Mrs. G. Mutchie presiding. The meeting opened with a hymn, after which all joined in reciting the Lord's Prayer in unison. Mrs. P. W. Sutherland then read the scripture lesson, Romans 14:5-19. After a short business session, the following program was put on: solo by Mrs. H. G. Jones, Reading, Mrs. S. Chumey; solo, Mrs. Ogilvie, Fairview. Mrs. Jones then gave a very interesting talk on her trip to California last year, and Mrs. Ogilvie gave a talk on the "Baby's Bumps" under the work of the W.M.B. Ice cream and cake were served, and a very pleasant social hour was spent. July meeting will be held at the home of Mrs. Chumey, Everbody welcome.

Mrs. Bowie and son, Alex, spent a few days in Edmonton recently.

Mr. and Mrs. Charles Youngs and Dorothy Youngs, of Didsbury, and Miss Mildred Brown, of Alder, visited the Bowies and Sutherlands over the week-end.

Dr. Gordon Sutherland of Waskassau, has been a recent visitor at his home here.

Mrs. Flegel, Ben., is spending a few weeks with friends in Edmonton.

EDMONTON EXHIBITION

It is expected that all roads will lead to the Edmonton Exhibition the week of July 16 to 21, as unusual interest is evinced in the many new features which the Exhibition Management have arranged for this year's show.

Many refuse to believe that farm tractors can be safely run at 60 miles per hour, but, seeing is believing, and this may be seen at the coming Edmonton Exhibition.

"Alpha" the ROBOT is another novel attraction that everyone will want to see. 7000 pound mechanical man that talks, smokes, fires a gun and performs many unbelievable feats.

The Royal Canadian Mounted Police will present a musical ride on three evenings of the Fair.

Another unique feature will be the giant Television Show.

"The Show of the Century," which is to be the special production in front of the grandstand is an outstanding production. There will be

Running Horse Races every afternoon during the six days of the Fair and the grand parade of prize winning livestock in front of the Grandstand.

The Exhibition Management have decided to repeat the advance sale of tickets at reduced rates, for the 15th Annual Edmonton Exhibition. These will be on sale throughout Northern Alberta to the end of the week before the Exhibition opens. A novel contest has been arranged for boys selling these tickets. Free trips to the Edmonton Exhibition, all expenses paid, will be awarded to the twenty boys in Northern Alberta selling the largest number of advance tickets and local citizens in every town will be boosting their home town boy for one of these coveted free trips to the Big Fair. Advance tickets will also be on sale by news dealers and Postmasters or you may mail a dollar direct to the Ticket Committee, Edmonton Exhibition Association, Ltd. Get your tickets in Lacombe from Irvin Todd or Robt. Layton.

Aberhart Talks on Douglas Plan

Facing an audience of at least three hundred people gathered in the skating arena, William Aberhart, of Calgary, pointed out weaknesses of the present system, which he claimed would be remedied under the Douglas Credit System.

With the aid of charts, Mr. Aberhart showed how this system would affect the farmer, and the methods by which the system would function. With an election not too far off in the future, Mr. Aberhart urged his hearers to use their vote to the best interests of the province and the people.

Following a meeting held here on Tuesday afternoon at the Douglas System of Social Credit, plans were discussed regarding the formation of organizations in the various constituencies, the drafting of a platform, the choosing of men who will stand for election on such platform, the forwarding of educational work, and the holding of a convention at a central point.

FLASH!

Hon. B. G. Reid, provincial treasurer and minister of municipal affairs will be the next Premier of Alberta. Whether this means complete reorganization of the cabinet has not yet been made known.

FLASH!

The Canadian Civic Liberties Protective association have announced their intention to bring the Hon. MacMillan case to the privy council.

Sale of House Baking and afternoon Tea in Mr. L. Sandbrook's Ice Cream Parlour, Aspen Beach, will be held by the W.A. of St. Cyprrian's Church, Lacombe, on Wednesday, July 11.

Grade nine and ten can get their school marks by applying to the Principal, phone No. 209.

The full school results will be out in next week's issue.

Remember the Last We Forget Club Picnic at Mrs. Halpin's, Aspen Beach on Wednesday, July 13th.

D. Chisner has also line of Men's and Boy's Slickers and Rain Coats at \$4.75 to \$6.75. See them.

At the Avalon

"Friday 13th"

"Friday the 13th", directed by Victor Saville, boasts one of the greatest casts ever assembled in a British picture.

Jessie Matthews, Sonnie Hale, Gordon Barker, Edmund Gwenn, Max Miller, Ursula Jones, Evelyn Williams, Frank Lawton, Belle Chynall and Donald Calthrop, to name but a few, are the leading players in a glittering cast.

The film was made from an original story by S. Gilliat and G. H. Mordaunt-White. Their idea is exceedingly clever, for it concerns a group of people gathered together on a bus.

Strangers to one another, these people are the victims of an appalling accident. A flash back shows us incidents in their lives leading up

to their getting on the bus, and tells how the life of each individual was affected for better or worse. The bus is wrecked on Friday the 13th, a lucky day according to the superstitious, but in point of fact the day is anything but unlucky for most of the passengers.

This picture is coming direct from the cinema office so this will be its first showing in Alberta.

WATCH LOST

Gold watch, lost near stock yards, Lacombe, on Friday or Saturday. Reward for return to this office.

LOST

Fair dark frame spectacles in Toric Optical Company case. C. A. Sneath.

FOR LUMBER AND BUILDING MATERIAL

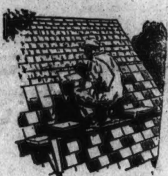

COME TO ATLAS LUMBER Co. Ltd.

LACOMBE, Alta. Thos. Wilkes, Local Mgr.

BUILD NOW REPAIR NOW AND SAVE MONEY

Lumber and Building Materials are Still Away Low in Price—and July is a good month in which to Build. Repair and make Improvements! So why not do your Building Work Now and take advantage of the present Low Prices! You are cordially invited to visit our yard, and inspect our stocks! We will be pleased to assist you in figuring up your Bills and Material for any Building Job you have in mind. We will be glad to quote you prices on your requirements.

British Columbia Red Cedar Shingles

SHINGLE PRICES ARE STILL LOW.

Bone-Dry, and neatly bundled, and in several good grades.

Protect your buildings with sound roofs. Keep your roofs in good repair with Cedar Shingles from our yard.

Screen Doors and Screen Windows

We stock these in the best grades. Fit up your home with Screens. This can be done at small cost. Keep the flies outdoors, and ensure comfort indoors. The only way to do it — is with screens.

Combination Summer and Winter Door

A real money and labor saver. This door is fitted with a fine screen panel for summer use, and a glazed mesh for winter use. Only one set of hardware is required. The change from a winter door to a summer door can be made in two minutes. One door that does the work of two! We can give you a good price on this Door.

Studding, Rafters and Joists

Any size, length or grade. We stock them all. Strong, straight and nicely milled. Best grades at Lowest Prices! An inspection of our stocks will convince you.

Wallboard

GYPROC FIREPROOF WALLBOARD

Makes a strong, smooth wall; and is Fireproof. Ideal material for inside walls of house or garage; and is easily put on with hammer and saw.

May be painted over, tinted or papered.

Shiplap

Bone-Dry, Clean Spruce in all widths, lengths and grades. We have a nicely assorted stock. Come in and see us for your requirements. We have the Shiplap you require.

Building Papers, Roofing and Felt

We stock a full line in several grades, and at Surprisingly Low Prices. Make your buildings cozy and Windproof with Building Papers.

Sheeting Boards

For Sub-Floors, Roofs, Walls and Repairs. Bone-dry, Clean Lumber. We have the grade to meet your needs—and at a price to suit your purse!

Hog Houses

HOG PRICES ARE STILL GOOD LUMBER PRICES ARE STILL LOW!

Look after your Hog Houses. Put them in good repair. Make your hogs comfortable and watch them thrive — and that means more money for you!

We stock the right types of materials for Hog Houses. We can advise you as to construction.

Doors and Windows

Standard sizes carried in stock at all times. We can furnish you with any Special Size at shortest notice.

Wagon Poles and Reaches

For Strong, Tough Hardwood Wagon Poles and Reaches—See our Stock. We have the best.

Finish Lumber

For interior trim—and for Framing Doors and Windows—and all Standard Mouldings—Come to Our Yard.

Barns and Sheds

Fix up your Barns, Cow and Cattle Sheds.

Comfortable Barns and sheds mean thriving stock.

Next time in town come in and see our Books of Plans and Pictures of Up-to-Date barns of every type. We will gladly advise you as to construction and costs.

FLOORING, SIDING and CEILING

We stock these in several good grades. We can furnish the Flooring in British Columbia Coast Fir and in Alberta Spruce—the Siding in Spruce and British Columbia Coast Fir and Cedar—and the Ceiling in Fir and Spruce. These stocks are Bone-Dry and Nicely Milled. They have been Properly Warehoused, and are ready for Immediate Use. No matter the Job—we have the right grade of Bone-Dry, Well Milled Lumber for that Job! Get your requirements from us and be sure of a Satisfactory Job.

Modernize NOW!

With Lumber! Allow Us To Show You How!

Wagon and Truck Box Material

We Stock Special Lumber for making Sound, strong Wagon and Truck Boxes.

We can quote you attractively Low Prices on this material. Make your Wagon and Truck Box with this material and Save Money.

Cement

Fresh, Clean Cement always in stock. For satisfactory concrete work use our Cement.

Lime and Plaster

Allow us to quote you on your requirements, our stock is New and Fresh.

THE CHARGE

In his charge to the jury in the MacMillan-Brownie trial at Edmonton, June 30, Mr. Justice C. W. Ives laid down certain principles as to the rights of the jury in assessing damages. In his judgment delivered Wednesday in which the verdict of the jury was overruled, Mr. Justice Ives lays down certain principles to which in his opinion the assessment of damages is limited.

IVES' CHARGE

In his jury charge, Mr. Justice Ives used the following words: "You are entitled to assume that if there was a seduction, the father has felt humiliation and has lost some services of his daughter, and you are entitled to assess, if you find seduction, such damages as you think will fairly compensate him. You may go beyond that and inflict exemplary damages, an expression of your opinion that the misconduct was such that it deserves punishment. You are entitled to assume that the female plaintiff may suffer at the hand of society and, if you find that her illness was brought about by this defendant, that is ground for damage, and you may assess to her such compensation as in your opinion will meet these items."

Our citizens were greatly pleased to see our old friend "Sam" English back on the job on Saturday night at the Barnett Avenue-Norton St. corner. He had quit his job on his hands Saturday night as there was a large crowd in town; but in his usual perceptive way, kept anyone with boisterous notions in line and there were no disturbances. "Sam" is a real policeman, when he speaks to a man who is a little out of bounds, that man generally takes heed; if he doesn't, then it is different; he can be pretty stern when required. At present Mr. English is engaged on Weed inspection, and if he has his way, weeds are in for a hard battle this summer. He will get results.

10c WHY PAY MORE
Best of all fly killers. Cheap, quick, sure, cheap. Ask your Druggist, Grocer or General Store.
THE WILSON FLY PAD CO., HAMILTON, ONT.

THE JUDGMENT

In his judgment published on Wednesday, Mr. Justice Ives used the following words:

"It is quite clear that the daughter left her home in Edmonton with the consent and approval of her parents, and was accompanied to Edmonton by her mother. It is equally undoubted that no illness resulted from the seduction, and no evidence that the ability of the daughter to render services was in any way interfered with."

"In my opinion the law is well settled that damage is the gist of the action, and I am also of the opinion that the damage necessary to found a right of action in the woman must be of the same character as gave the master his right of action, that is, loss of service, or at least an interference with the woman's ability to serve. I see nothing in our statute to convey a contrary intention of the legislature."

NOTICE
I have moved by Blacksmith Shop to the building next to the Alberta Feed Barn, Glass St. General Blacksmithing, and will make good rubber tires. Satisfaction guaranteed or money back. C. E. Stoeber.

Newest Summer Frocks

Men's Summer Combinations
Clearing Broken Lines at 75c.
and plain knit. Some are buttoned front and others in one button style. Sizes 34, 36 and 38 only.

Men's and Boy's All Wool
Swim Suits \$1.35 and \$1.95
Suits that fit snugly and retain their shape. Elastic rib knit in "Speed" style. Colors: black, wine, green. Sizes 34 to 44. Boy's sizes 26 to 32.

Young Men's Sport Shirts
Clearing 75c.
Regular \$1.25. Green, knit cotton shirts; long sleeve; Collar attached; four button front. Sizes 14 1/2 to 15 1/2.

Special! Misses' Sand Crepe Jacket
Dresses \$9.00
Dresses that serve a double purpose. Wear them with or without the coat. Dresses of smartly striped or plain Sand Crepe. The jackets are in red, brown, navy and green. Sizes 16 to 20. Regular \$12.95.

Cool, Smartly Styled Printed
Cotton Frocks \$1.95
Fine quality broadcloth prints in dots, plaids and flower patterns. Trimmings of Organdy and Pique. There are youthful, becoming styles for Misses and Women. Sizes 14 to 44.

Misses Summer Coats
Final clearing Price \$9.75
The sizes are 16 and 18; materials wool Crepe and Velour. Trimmed with Organdy. They are new and smartly styled and have Quince Taffeta linings.

Organdie, Voiles, Pastel Crepes, Silk Pique - - -
Delightfully Cool and Becomingly Styled Frocks
in a large range of Styles for \$2.95 & \$3.95
Women, Misses: Size 14 to 44

Washable! White Skirts \$1.95
White pique, Summer Skirts. Easy to keep looking fresh and cool. They're in plain white with red trim. Sizes 14 to 20.

Misses' Cotton Slacks \$1.95
White, Red and Green duck Slacks. They have wide, cuff-ed bottoms, snug fitting, belted waists. Sizes 16 to 20.

Women's Panama Hats \$1.95
White for July days. The newest shapes with wide or narrow brims.

Lace Waists 95c.
Cool, lacy waists to wear with suits or separate skirts. Colors: white, blue, tan and green.

Women's Suede Taffeta
Slips \$1.25
Lace-trimmed, slightly-fitted style. A slip for all summer frocks. Sizes 34 to 42.

Men's Military Flannel Shirts \$1.00
Work shirts for summer, in this most desirable of cotton shirting. They're in coat style. Grey shades. Sizes 14 1/2 to 17 1/2.

Boy's Sport Socks
Ankle Length—30c. pair
Sturdy cotton socks; cool and comfortable for Summer days. Sizes 8 to 10.

Boy's Leather Belts 50c.
Attractive, black and white leather belts. Mannish looking. Just the style you want for Summer wear.

Boy's Whoopie Pants \$1.25
Size 11 to 16 years. A hefty black drill to give greater wear; plain or elastic insert at back, and wide cuff bottoms.

Men's Work Shoes \$3.75
A solid-grained leather upper, made with soft ties and outside counters. Tough, long-wearing leather soles are nailed and sewed.

Men's Slater Black Kid Oxfords \$7.50
Shoes that combine the newest styles with the traditional Slater quality. Your feet are well dressed in Slater shoes. Shoes. Sizes 7 to 10.

Women's White Shoes \$3.75
Ties, Oxfords, Pumps, smartly styled in new summer patterns. Cuban heels. Sizes 5 to 7 1/2.

Women's T-Strap White Sandals \$2.35
Cool footwear in white leather style. Perforations as trimmings. Cuban heels. Sizes 4 1/2 to 7.

Boy's Dressy Black Calf Oxfords
\$3.50
A good looking, good quality shoe for boys. The uppers smooth, black calf leathers and Goodyear welted soles. Sizes 1 to 5.

Clearing Printed Voiles and
and Dimities 33c. yard
Mostly in short lengths of one or two dresses and you have a choice of several patterns.

Children's Dimity Combinations
Clearing 50c.
Dimity combinations Clearing 50c. Regular 75c. suits. Made of good quality dimity and finished to give the best of wear and comfort. Sizes 2 to 8 years.

Cucumbers, Hot House, large 15c.
New Carrots, Potatoes and Cabbage.

Quick Relief Now From Neuralgia

JACK, IN TO SEE CLARK ABOUT THAT BUS CRASH IN 40 MINUTES AND I HAVE NEURALGIA. WHAT CAN I DO?

LATER JACK, I GOT THE ORDER! YOU BET IT ALWAYS GETS ASPRIN WHEN I WANT QUICK RELIEF FROM PAIN.

DON'T WORRY! GET SOME ASPRIN. TWO TABLETS WILL STOP YOUR PAIN IN A FEW MINUTES.

Real ASPRIN Starts Taking Hold in Few Minutes

Now comes amazingly quick relief from headaches, rheumatism, neuralgia, the fastest safe relief, it is said, yet discovered.

These results are due to a scientific discovery by which an Aspirin Tablet begins to dissolve, or disintegrate, in the amazing space of two seconds after touching moisture. And hence to start "taking hold" of pain in few minutes.

The illustration of the glass, here, tells the story. An Aspirin Tablet starts to disintegrate almost instantly you swallow it. And thus is ready to go to work almost instantly. When you buy, though, be on guard against substitutes. To be sure you get ASPRIN's quick relief, be sure the name Bayer is on a cross is on every tablet of Aspirin.

Does Not Harm the Stomach

Gold Still Is King

The lure of gold continues to exercise its sway upon the minds of men. Countries may go off the gold standard. New economists may argue, as they will, against gold as a monetary basis. Despite all the argument, "about it and about," the yellow metal still casts its potent spell, alluring men to brave hardship and danger in its quest, compelling men to undertake hazardous expeditions to win it, inducing countries to exert desperate efforts to acquire it. Mirage or otherwise, it glides the horizon of new prophet and old priest, of poet and peasant, of rich and poor, of commoner and peer.

Phantasm or reality—gold still is king. These somewhat without platitudes are evoked by the recent appearance in a financial journal, of two items on gold which, strangely enough, were placed in close proximity. The one was headed: "Nations still scrambling for gold," and the other "330,000,000 Buried by Pirates Sought." The one article demonstrates the hold which the gold tradition has upon world statesmen; the other epitomizes the ingenuity and risk employed and undertaken in efforts to win the precious metal—a gamble with life and money.

Relative to the international scramble, it is stated that, Britain and other non-gold-standard countries, including the United States, of course, are buying gold wherever it can be bought, and that their accumulations of gold now break all previous records.

Replying to the question why the United States continues to purchase gold, the New York Times recently replied that, in principle at least, gold still remains the world's monetary standard. Continuing it said: "No government is shaping its monetary policies in line with the dreams of the imaginative 'New School Economists.' Every government is recognizing the paramount necessity of return to a stabilized basis of international valuation, and the only way of achieving this is by accumulating gold. The fact that every nation—even those which have suspended gold payments—is guarding the gold reserve against the central bank notes issued as scrupulously as it did half a dozen years ago. Whereas the Bank of England, at the beginning of 1928, held the smallest gold reserve in more than a dozen years, it has subsequently added nearly \$350,000,000, bringing the reserve to the highest figure in its history. . . . The general process is indirect recognition of the gold standard. The possession of adequate and concentrated gold reserves would unquestionably be of high value whenever return of sound international conditions should make return to sound and stable currencies a possibility."

The other story is somewhat similar to the famous Cocos Island treasure hunt. It refers to a projected expedition from Britain to Tahiti in the south Pacific, to reclaim approximately \$300,000,000 in gold ingots and a fortune in jewels, said to have been buried by pirates in or about 1816. Usually such treasure hunts originate with discovery, in some peculiar manner, of a map of the cache. Such a map Stevenson introduced in his "Treasure Island," such a map as alleged to have been found on the chest of some old sailor in some Barbary Coast "dive." In this particular instance, the map came into possession of an Australian in 1900, who, it is said, visited the island and succeeded in removing some of the jewels. These, he subsequently buried—a peculiar enough action for which no reason is given. However, in March 6, 1934, the same gentleman claims to have located the treasure at the exact point indicated by the map. Speaking of the discovery, he says:

"There are only two things to contend with in drilling for the loot—sand and coral. The drill went down through the sand, ground its way through the rough coral and rested on the gold. There is no rock off Tahiti and by the drill, we felt out the shape of the ingots and also are able to determine the extent of the treasure. The drills spin on gold just as a top would on a marble floor."

It is upon such evidence and such representations, apparently, that hard-headed British engineers and business men are prepared to risk their money, and expend their enterprise.

Soldiers Stayed in France

Over Thousand Americans Married And Made Home There. More than fifteen years after the bugles blew "cease firing," about 1,100 American veterans of the World War linger in France. Most of them are "voluntary exiles" for the sake of French wives. Their numbers are dwindling, however, for in 1931 they were 1,700 strong, figures gathered by the American Legion Post show. More than half live in Paris; the rest are spread over forty-nine departments.

Flotsam And Jetsam

Goods lost at sea and found floating are called flotsam. Goods thrown overboard or jettisoned, during a storm, or washed up from a wreck, are called jetsam.

"They do not belong to the finder, even if he cannot trace the owner. They must be handed over to the Crown, and part of their value is paid in compensation."

Change of Climate, Diet, Water Often the Cause of Diarrhoea

If you are suddenly attacked with Diarrhoea, Dysentery, Colic, Cramps, Pain in the Stomach, Summer Complaint or any Looseness of the Bowels, do not waste valuable time, but get a bottle of Dr. Fowles' Strawberry and see how quickly it will relieve you.

This bowel complaint remedy has been on the market for the past 38 years. Proof enough that you are not experimenting with some new and untried medicine.

Do not accept a substitute. Get "Dr. Fowles' Strawberry" when you ask for it, and be on the safe side. Put up only by The T. Milburn Co., Ltd., Toronto, Ont.

The Great Zambesi Bridge

Remarkable feat of engineering in heart of Rhodesia.

Spanning the Zambesi Gorge stands one of the highest bridges in the world. This bridge is in the heart of Rhodesia, far from civilization and so near to the great Victoria Falls that trains crossing the bridge are sometimes held up by spray from the turbulent water. The building of the Zambesi Bridge was a marvellous feat of engineering. First of all a rocket had to be fired across the rocky chasm. The rocket was attached to a line, which in turn was fastened to a length of wire and a steel rope.

During the construction of the bridge the builders worked at a dizzy height over the swirling waters below.

When workmen began their task a large net was spread beneath them to prevent catastrophe, should any of them lose their balance.

But instead of steadying their nerves they complained that the net served only as a constant reminder of their perilous position, and so it had to be removed. After a period of little more than six months the bridge was completed, and a train travelling at fifteen miles an hour was driven across to test its strength.

The structure was painted grey so that whenever the materials rusted in any part the defect would immediately be noticed. This impressive feat of engineering in the wilds in no way detracts from the beauty of the scenery.

Harbor Expert Dead

Sir Frederick Palmer, Who Recommended Churchill Was Noted Engineer.

News reached Canada recently of the death at Lingfield, near London, England, of Sir Frederick Palmer, the man whose recommendation caused Churchill to be developed as Western Canada's northern sea outlet.

When Hon. C. A. Dunning assumed the portfolio of minister of railways in the Dominion cabinet in 1906, he sent to England for Sir Frederick, one of Britain's most noted engineers.

Sir Frederick went into the northland and after an extensive investigation, recommended to Mr. Dunning that Churchill be the northern port instead of Nelson.

The recommendation was acted upon, and Churchill became the outlet to the world for Western Canada via the sea.

For many years Sir Frederick was chief engineer of the Port of London Authority. He served as consulting engineer for many railways both in the old country and India, in addition to being engineer of the Calcutta port. In 1929 he was named engineer for the new \$200,000 Charing Cross bridge, London.

Fraudulent Stock Promotions

Government To Put Spoke In Work Of High-Pressure Salesmen

The House of Commons took the first step recently to spook the work of high-pressure stock salesmen when it passed the Consolidated Companies Act which practically remodels the laws governing company formation.

Designed to stop fraudulent stock promotions, the bill would make it impossible to sell promotion stock except through a prospectus approved by the secretary of state. Among other provisions, fines and imprisonment would be established for any house-to-house stock canvasser or any organization that used a telephone and sucker list to promote sales. Penalties would range from \$500 for a first offence to \$1,000 and a year in jail for subsequent convictions.

Alter Colonial Sugar Duties

Britain Diverts West Indies Product Back To Canada

The British House of Commons has approved proposals contained in a white paper issued in April to alter the colonial sugar duties in such a way as to divert the flow of the commodity to Canada.

The white paper, issued when the budget came down, would send sugar back to Canada from which it was driven when the pound sterling reached a premium in Canadian funds.

Fall in value of the Canadian dollar dislocated the sugar trade between the Dominion and the British West Indies and sent most of the commodity to the United Kingdom.

Willing To Co-operate

"Woman is very reasonable," said a venerable New Hampshire justice of the peace. "I remember that my wife and I were talking over our affairs one day, and we agreed that it had come to the point where we must both economize. 'Yes, my dear,' I said, 'I am sure we must both economize, both.' 'Very well,' Henry," she said, with a tired air of submission, 'you shave yourself, and I'll put your hair.'"

Druggist—"How's your wife to-day?" Customer—"Oh, she can't complain."

Druggist—"I didn't know she was as ill as that."

BABY'S CRAMPS Banished!

"When I could not sleep at night because of colic (cramps) I used Baby's Own Tablets. They worked like a charm. I am now a happy mother and my baby is a happy child."—Mrs. J. H. Green, Hamilton, Ontario.

BABY'S OWN TABLETS

Dr. Williams' Pink Pills for Pale People

Africa Fighting Locusts

New Chemicals Being Used In Attacking Prairie Hoppers' Cousins While Canada waited for invading grasshoppers to develop the attack, London reported the launching of a new British offensive against the prairie hoppers' first cousins, the African locusts.

Under directions of the British Colonial office, H. H. King, formerly entomologist to the Sudan government, recently left London for Africa to conduct the campaign on new lines, says the report, published in the London Morning Post.

Two elements combine to make success probable—the locating of the breeding and swarming places of the locusts and two new chemicals, one sticky and the other a gas, the use of which is being tested. The use of insects, which will be sprayed from an aeroplane. If there are survivors of this offensive, they will be useful elsewhere.

The first chemical is a liquid which, on coming in contact with vegetable matter, immediately forms a compound carbonating any animal matter within an area of several feet. Its composition is a secret. The other is a powder whose chief element is sodium arsenite.

At to the latter, an official of the Colonial Office spoke as follows to a representative of the Morning Post: "Two years ago Mr. King discovered by laboratory tests that the adult locust fed a speedy victim to a spray of finely ground sodium arsenite."

"He conceived the idea that flying swarms might be successfully countered by the discharge of a cloud of this poison dust from a plane proceeding across the line of their flight."

Calculations made by the Chemical Research Department of the War Office indicate that the rate at which sodium arsenite powder of the required density will fall through the air is low enough to cause no difficulty in creating a suitable cloud in advance of the flying locusts.

No danger to human beings; crops and livestock is likely to arise from the use of the poison dust, in view of the fact that the natural disposition of locusts is to feed on vegetation within a short time to a point at which its effects are no longer poisonous.

Author Of "Beautiful Joe"

Miss Margaret Marshall Saunders Receives Recognition From The Literary World

Smiling and happy at being named in the King's birthday honors list, 73-year-old Miss Margaret Marshall Saunders received many congratulatory messages from friends in Canada and the United States. She was named a Commander of the British Empire.

"The honor done me is as much an honor to the women members of the many clubs with which I have done humane work," said Miss Saunders, whose story of "Beautiful Joe," a dog, has been published in 14 languages, put into Braille and is now being translated to Japanese and Burmese. "It touches me much," she said, "that such a tribute should be given to the humane side of women's work."

Miss Saunders, who was born at Liverpool, N.S., did her first serious writing after she was 30 years old. She entered in a United States contest her "Beautiful Joe" as a companion story to "Black Beauty," then being widely published on behalf of humane work. Her entry won the prize and her work became known throughout the world.

Young Wife (returning to village after runaway match)—"I suppose my opponent was a nice day's work?"

Village. Worth—"It would have bin, mum, only Buggin's dog went mad the same night."

Fifty years in which to pay cost of the court, totaling \$750,000, has been given to an unsuccessful litigator in Bernard Kelly, a dock laborer in Liverpool.

Don't Read This

Unless you are interested in a medicine which has helped over 700,000 women and girls take it before and after childbirth, at the Change or whenever you are nervous and restless. 98 out of 100 say, "It helps me."

LYDIA E. PINKHAM'S VEGETABLE COMPOUND

Discovers New Element

Is Described As The Hardest Substance Known To Man

Discovery of a new element known as "No. 93," which was artificially created from uranium, was reported to the Italian Lincei Academy by Senator Mario Corbino, who saw in the accomplishment evidence that the world will grow young again and its materials will be renewed.

The discovery was made, he said, by Enrico Fermi, member of the academy, through bombarding nuclei of uranium with neutrons. "Uranium after having absorbed neutrons converted itself rapidly through emission of electrons into an element placed immediately higher in the series, that is, a new element, bearing the number 93," said Corbino.

"This element embraced a nuclear charge greater than that of any existing element. The new element is radioactive, and its chemical properties are analogous to those of manganese."

Corbino told his distinguished audience, which included King Victor Emmanuel, that "the study of the nucleus, now in its beginning, aims at the ambitious plan of giving back to the earth the youthfulness of its materials."

"One can now affirm," he declared, "this ambitious design has been converted into reality."

Fermi's discovery, he added, "is in effect a manifestation of new youth communicated by nuclear collision to old established matter."

The new element was described as the hardest element known to man, and Corbino emphasized the importance of its discovery and the method employed.

"Since uranium was discovered," he continued, "discoveries of new elements had the effect of filling up vacancies among simple bodies between the extremes of No. 1, hydrogen, and No. 92, uranium."

"In the case of the new element, 93, however, we deal instead with the artificial discovery of a new element constituted outside the series of elements known on earth."

Elimination Of Dreaded Leprosy Is Predicted

Expert Says Disease Lessening Under Improved Treatment

Dr. Arthur J. Rogers of the Royal Society of Tropical Medicine, who for more than a score of years has battled tropical disease plagues, predicted that leprosy will eventually be stamped out.

Travelling to British possessions in Central Africa after a stay in South America, Dr. Rogers said improved treatment methods are diminishing the ravages of the disease. He said an educational program of sanitation and physical hygiene is being pushed in the remotest of Africa, India and remote stretches of South America.

"When the natives of these countries have been thoroughly educated and additionally taught to seek medical aid promptly when the disease becomes apparent there is no reason why leprosy should not be completely eliminated," he said.

Dr. Rogers said treatments applied now in many places, including Louisiana's leper colony at Carville, were producing cures in 85 per cent of first stage cases; 17 per cent in secondary cases, and alleviating suffering in third stage cases.

The New Style Bicycle

Velocet Allows Rider To Assume Semi-Horizontal Position

Rest when you cycle, may be the adage slogan of Stewart and Ernest Worrall, of Hamilton, Scotland, for their new invention, which they call the velocet. They predict a day not far distant when the ordinary bicycle will take its place beside the bone-shaker as a relic of the past. The velocet is a motor cycle in a semi-horizontal position, thus making it more comfortable than the ordinary machine, and the handlebars stretch almost from the front to the back wheel. A recent race between velocet and a motor cycle, at Paris, resulted in an overwhelming victory for the new machine.

Not "Early To Bed"

Early to rise may be necessary for good health, says Miss Margaret Gorman, of Chicago, 102 years old, but not early to bed. "I get up every morning at 7:30 o'clock," she says, "and frequently stay up late at night." Miss Gorman, a native of Ireland, recently observed her 102nd birthday anniversary.

Her Only Problem. Rose—"I've just had an argument with my wife. Women think they know everything."

Joan—"Well, there is one thing my wife admits she doesn't know."

Rose—"Really, and what can that be?"

Joan—"Why she married me."

World's Tallest Animal

The giraffe is the tallest animal in the world today—if it stands steadily on its feet to height. Despite the fact that its neck is amazingly long, it has no more bones than the necks of all other animals; all animals have seven neck bones, with the exception of the sloth, which has one more.

Martyr To Radium

Last Of Scientists Who Aimed Mine. Curie Is Dead

Henry T. Koenig, 42, a chemist of Denver, Colorado, who had worked for years under a self-imposed death sentence, died a martyr to his research work in radium.

Koenig was the 30th to die of the 30 scientists who aided Mme. Curie, discoverer of radium, in her research work.

One by one Koenig's companions died from malignant infection induced by contact with the mineral.

But he continued his work, although he knew that each contact further weakened his system. Through his work and that of his companions thousands have been given relief.

Koenig's work in perfecting a system whereby radium extraction could be accomplished at a lower price than ever before was recognized by authorities as one of the greatest contributions to medical science.

He studied the rich radium ores of the Belgian Congo in 1922 and 1923. His development of the ores in this region remedied all danger of a monopoly in radium.

During the World War he adapted radium to peat use in warfare. The use of radium for the illumination of watch dials at night was the result of his research.

Three months ago he was "lured" to Porter's Sanatorium, suffering from cancer of the hip. Treatment failed to check the disease and he died.

Irrigation Plans

Proposal To Irrigate Large Block Of Land In Southwest Saskatchewan

Irrigation for between 5,000 and 10,000 acres in southwest Saskatchewan is proposed in a plan to be urged before the Saskatchewan government.

Facing a feed shortage for the third successive year, farmers around Valmarie and Cuthbert are asking the government to build a dam on the Frenchman river with a 15-mile main ditch south and east through Foothills.

Alfalfa would be sown with two crops a year, providing a likely crop of 25,000 tons or enough to feed 20,000 cattle.

An experimental dam is being built by George Newton to serve his farm a few miles west of Valmarie.

J. R. Reid, Regina, is doing the engineering work. A small dam is being built at the Frenchman river, pump installed, and the scheme developed to supplying about 250 acres.

Mr. Reid said that with two crops a year about 1,250 tons of alfalfa can be grown, sufficient to feed 1,000 cattle.

Canada Leads The Way

Comes First In Industrial Recovery According To League Figures

Canada leads the way in industrial activity. League of Nations figures for the first quarter of 1934, compared with the first quarter of last year, show these per centage increases in industrial activity:

Canada, 40 per cent; United States, 30 per cent; Germany, 25 per cent; Poland, 25 per cent; Sweden, 18; Japan, 11; Norway, 6; France, 3.

Unemployment is decreasing in all the principal countries of the world except France.

World production of certain important commodities shows an appreciable increase, the figures also reveal. During the first quarter of 1934, production of coal increased by 20 per cent, of gasoline 12 per cent, pig iron 51 per cent, steel 34 per cent, and zinc 37 per cent, in comparison with the same period of last year.

On the other hand the gold value of world trade again shows a decrease for the first quarter of 1934.

Would Rather Be Friends

Japan Willing To End Trade War With Great Britain

The Japanese who so confidently accepted the British challenge to a trade war, are not so sure to-day that they want any more of it. The Japanese Foreign Minister advised the Court of St. James Ambassador that it would be quite in order for him to make known the fact that the heads of the Flower Kingdom were ready, willing and anxious to start a new trade war with the British. The trouble to an end. And the last word which we have is to the effect that the British "too are loth to be at logger-heads with their old friends and that in the very near future a get together will be held and the feeling is that the war will ironed out to the reasonable satisfaction of everyone."

A New Industry

Alberta has a new and flourishing industry—the development of a deposit of fossilized oyster shells, 15 miles north-west of Cardston. Once a vast inland sea, thousands of years ago, the shell deposit is on the side of a hill. The shells, when ground, contain valuable mineral food content for hog and chicken feed. Previously all shells produced were imported.

Naturalists have discovered that spiders live to a ripe old age. Nevertheless their life often hangs on a thread.

Roll Along

Little Ogdens..

He's headed for the fast round-up of smoking enjoyment—"getting along" to full smoking pleasure with Ogdens' Fine Cut Cigarette Tobacco.

Hero Of Russo-Japanese War

Admiral Togo, Who Died Recently, Was Idol Of Japanese People

Admiral Marquis Kishinichi Togo, the silent little hero whose destruction of the Russian fleet 20 years ago placed Japan among the great powers, died at Tokyo recently. At the age of 86 and with the rank of Japan's greatest hero, he surrendered to cancer of the throat.

Admiral Togo was the last and most illustrious of all the heroes of the Russo-Japanese war. For several weeks he had been seriously ill. The day before he died the emperor elevated the aged sea hero from the rank of count to that of marquis. Posthumously he was promoted to admiral of the highest court rank.

Hurricanes On The Sun

May Cause Drought-And Dust Storms Says Veteran Student

Swirling hurricanes on the sun may be the cause of droughts, and dust storms in the Mid-West. These great solar storms, which appear to astronomers as mere sun spots are reaching an 11-year period of maximum intensity—Dr. C. G. Abbott of Smithsonian Institution, Washington, veteran student of the sun and long range weather predicting, is confident they have a great effect on weather all over the earth. And "I would not say flatly that they have no connection with this drought in the Mid-West."

It is now possible to determine the speed of lightning by use of special photographic apparatus. Experiments of this kind recently revealed that the average speed of lightning is around 28,500 miles per second.

Episode Of Cotton Trade Shows That Museums Often Render Vital Service To A Nation

The cotton manufacturers of Lancashire, England, have made overtures to the British government seeking official intervention to protect the cotton trade against the competition of Japanese textiles. Paradoxically, Lancashire has been the mother of the ardent free trade school which was put under eclipse by the present government.

This is not the first time that the English cotton trade has felt the sting of competition from foreign manufacturers. An example of such a contest was cited recently in Toronto by Dr. C. T. Curry, director of the Ontario Museum attached to the University of Toronto. In this instance the field of battle stretched down the entire coast of Africa.

It was about the turn of the present century. The British cotton trade in Africa flourished. The heads of German museums, well supplied with money, launched on an extensive tour of several months' duration down the African coast.

The native African was something of a weaver in his primitive way. Every pattern that he wore with his African grass had a meaning. This pattern was a prayer for rain. That one was a prayer that would keep the evil spirits away from the baby at night. So design was everything.

What did our German museum men do? They visited every tribe on the west coast and they acquired a sample of every pattern woven by the natives. The acquirers returned to Germany with an enormous variety of samples of African weaving.

"Come and see," they said to the textile manufacturers of the Fatherland. They not only came and saw—they copied. Soon German ships were carrying African patterns in German clothes back to the tribes on the west coast.

It was a hard blow to England. Almost overnight 75 per cent. of the British cotton trade in Africa was wiped out. Germany made phenomenal progress in Britain's expense.

Only in the past few years, after a quarter of a century, has the African showed any tendency to return to the British product.

Dr. Curry's recitation of this episode of the cotton trade was a story of course, to demonstrate the vital service that museums can render to a nation. Most of us have had the idea that a museum is a place to house ancient relics for the amusement of those who stare at them because the present is too fast for them. Anyone who has had the privilege of spending an hour or so with Dr. Curry will know that a good museum teems with information of tremendous value to an industrial nation. He will also know that the director of a good museum is a man who knows the wide world as few people know it, a man who knows so much about the old world that he knows a tremendous lot about why the present world is what it is.

No, museums are not so dead, after all!—Stratford Beacon-Herald.

Uptrend Held Unlikely
Hardly Possible World Wheat Price Will Advance Greatly

The Financial News considers the possibility of a world uptrend in prices was improbable. "It is possible," it said, "that a large part of the responsibility for the low level of world prices is to be found in the fear that on any breakdown of the wheat agreement the United States would dump her surplus of over 200,000,000 bushels abroad."

"Removal of these fears might cause a much more buoyant tendency, otherwise no outstanding, sustained strength in the international market could be assumed to result from American crop damage such as appears to be at present. In America itself, however, a reasonable rise in the prices of grains seems likely to be maintained."

Investment In Fall
Recipients of knightships and honors in the King's birthday list will not be invested officially with their new rank until September or October, it was stated at Ottawa. Some of the persons who figured in the honor list are at present in Europe, so the investiture will probably not take place until after the return of the governor-general from his summer residence in Quebec.

Melons Dislike Noise
Why melons are fever and more sickly in Southern France than years ago has been traced. It is noise. Chinese gardeners declare that loud sounds are harmful to the fructification of the melon blossom. Auto horns and the shaking of heavy vehicles on highways and rails have so disturbed the "blossoms" that they have ceased to thrive.

The amount of branded beef sold in Canada during April was 3,596,821 pounds. In April last year the amount was 2,764,335 pounds. In 1932, 1,618,644 and in 1933, 1,983,022 pounds.

W. N. U. 2050

Newspapers in Russia

Over 4000 Are All Under Soviet Control

Newspapers in Russia have just been celebrating their 22nd anniversary. Of course, there were newspapers in Russia long before 1917, but that was the date the Communist paper Pravda was founded, and the Soviet government ignores the existence of any newspapers of the Czarist regime. There are now 4,182 newspapers in the Union, compared with only 600 five years ago, and they have larger circulations than newspapers had before the revolution.

Pravda and Izvestia, the chief papers, have circulations of over 1,600,000, this being attributed to the spread of compulsory education, literacy being now an uncommon thing in Russia, outside the remote areas.

The public is encouraged to read newspapers, one reason being that they are all under Soviet control, and each is an official mouthpiece for the Soviet government. Any item that appears in a Russian newspaper is officially passed by a Soviet official.

In fact every newspaperman is a government official. No opposition papers are allowed. This makes for drab and standardized newspapers as they are part of the government machine. News entering the country from agencies is carefully sifted at a central office, and only what pleases the Soviet officials in the office is allowed to be sent out to the various offices. The government owns all the printing presses in the country, and the result is that nothing can appear anywhere which has not approval of the Soviet.

One interesting feature of Russian newspapers is that no crime news of any kind is published except when the perpetrator is tried and punished. If a murder occurs, the public is not told about it in the newspapers, except when sentence is pronounced.

There are very few advertisements in them for the reason that there is a shortage of goods of all kinds and there is nothing that has to be "pushed" in order to sell.—St. Thomas Times-Journal.

Must Preserve Schools

Nations Will Pay If Education Of Young Is Neglected

A movement to repair the damage of the depression in the schools of the United States was started at a meeting of educators at the Board of Education Building, New York.

Dr. George J. Ryan, president of the Board of Education, declared the nation "must choose now whether we will have schools today or build jails tomorrow." Unless the school system is capable of preparing young people for the future of tomorrow, as well as for vocations, the country "will pay for the neglect tenfold and over in crime, debility and human waste," he said.

The meeting was to organize the annual convention of the National Association of Public School Business Officials to be held here Aug. 15-24. In connection with the convention the association will present the first National School Mart Exposition, in which will be displayed the most advanced developments of school equipment, supplies and buildings.

Joseph Miller, Jr., president of the association and secretary of the Board of Education, said the forced economies of the World War did not cause the schools to suffer as have the economies of the depression.

"You can patiently wait for national recovery to restore normal activity in almost every other field," he said, "but you dare not permit millions of school children to grow up either mentally or physically starved. Childhood cannot wait."

"For the best interests of humanity the backward march of education must be halted. Our nation can survive only so long as we are true to the basic ideals of universal education. We cannot be loyal to our nation if we suffer our schools to be destroyed any further."

Household Hints

A little glycerin rubbed around the glass stoppers of bottles will prevent them from sticking.

Always remember to put a teaspoon of salt into the water in which you cook eggs. This will prevent the shells from cracking.

Tissue paper makes an excellent polish for window glass and mirrors. Wash, dry and then polish with the paper.

A little burnt sugar added to flour used in making gravy to serve with roast beef or lamb adds to the flavor of the gravy.

Put a pinch of salt, not enough to taste, in your fudge. The fudge will be very smooth when poured out and cooled.

When preparing early rhubarb for pies it is not necessary to peel it. Just cut it into very thin slices about a quarter of an inch thick.

Raisins will not stick to a food chopper if the chopper is dipped in hot water before the raisins are put in.

All custards are much richer when made with yolks of eggs alone than with both yolks and whites.

A small pinch of soda added to salad dressing will prevent its curdling.

The more we see of organizations, the better we like individuals.

ONE WAY OF CROSSING THE CHANNEL

A year ago Mr. Schlippeoord of Holland, performed the difficult feat of cycling across the English Channel on a water-bicycle. This year he intends to attempt a more difficult task, and paddle across the Channel in a barrel equipped with a sail and radio. Here we see the daring Dutchman with his unique craft.

Survey Of Crops And Livestock

Collecting Statistics Of Acres Under Crop And Number Of Livestock And Poultry On Farms

In June of each year, the Dominion Bureau of Statistics, in co-operation with the Provincial Departments of Agriculture, distributes card-board schedules to farmers for the purpose of collecting statistics of acres under crop and the numbers of livestock and poultry on farms. An innovation of 1931 extended this survey to cover the breeding and marketing intentions with regard to livestock. In all of the provinces, except Nova Scotia, Alberta and British Columbia, these schedules are distributed to the farmers through the rural school teachers. In these three provinces, the cards are mailed direct to the farmers.

The accuracy of field crops, in particular, are the foundation for obtaining agricultural production statistics. Only slightly less important in national planning is the necessity of having correct knowledge of the number of livestock on farms.

The accuracy of compilation in both these classes is largely dependent upon the obtaining of completed cards from a fair sample of the total number of Canadian farms. We would urge upon all farmers to cooperate with the government in this undertaking.

High Cost Of Junk

Cars Purchased For Almost Nothing Menace To Traffic

An odd little footnote to the automobile age was furnished the other day, when a man bought a used car for \$5, drove it out on the highway, and a few hours later got into a traffic accident that did \$100 worth of damage.

The incident emphasizes our need of some strict kind of regulation to cover the use of aged and decrepit machines. You can doubtless imagine the kind of car that can be bought for \$5; not much thought is needed to convince one that such a car must be inherently unsafe, to driver and to others.

Why shouldn't we get busy and rule all such wrecks off the road? The highways are dangerous enough, and even when all cars are well equipped and in perfect condition.

To permit \$5 cars from the junkyard to operate is sheer folly.—Guelph Mercury.

Two of the most comfortable things in the world are old shoes and old friends.

Depends Upon Goal

War Is Human Activity Neither Good Nor Evil

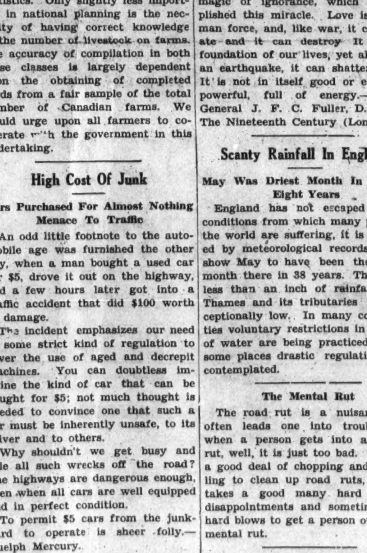

War in itself is a force which is neither good nor evil; it is a human activity which, like all other such activities, depends for its goodness or its wickedness upon the goal set before it by the mind of man. To anathematize war is to sink back into witchcraft; to outlaw, to exorcise, or to lay it under interdiction is to divide ourselves with spells and rely upon the barbaric invocations of sorcerers. We cannot exorcise a human activity unless we first exorcise ourselves, our minds, our feelings, our emotions, our passions, our prejudices, for centuries, through their insanity stimulated the insanity of witchcraft, and it was not until the human mind could think sanely about this moral pestilence that sorcery grew thin and ultimately faded away. It was the light of reason, and not the magic of ignorance, which accomplished this miracle. Love is a human force, and like war, it can create and it can destroy. It is the foundation of our lives, yet also, like an earthquake, it can shatter them. It is not in itself good or evil, but powerful, full of energy.—Major-General J. F. C. Fuller, D.S.O., in The Nineteenth Century (London).

Scanty Rainfall In England
May Was Driest Month In Thirty-Eight Years

England has not escaped drought conditions from which many parts of the world are suffering, it is indicated by meteorological records, which show May to have been the driest month there in 38 years. There was less than an inch of rainfall. The Thames and its tributaries are exceptionally low. In many communities voluntary restrictions in the use of water are being practiced and in some places drastic regulations are contemplated.

The Mental Rut
The road rut is a nuisance, and often leads one into trouble, but when a person gets into a mental rut, well, it is just too bad. It takes a good deal of chopping and shovelling to clean up road ruts, and it takes a good many hard knocks, disappointments and sometimes real hard blows to get a person out of his mental rut.

California, which developed its orange industry on the Navel orange, now has two million more Valencia orange trees than Navel.

TURKEY HAS PASSED A LAW HELPING OLD PEOPLE, AND ZARO AGA, WHO SAYS HE IS 159, CLAIMS HIS BACK PAYMENTS ON THE LAST 94 YEARS.

American Writer Says Part Of War Loan Should Not Have Been Charged Against Allies

The Password Is Quality

Canada Following Up Her Good Work In Poultry Exports

"If Canada is going to get its share of the British trade in poultry, in bacon, in live cattle, or in any other of its agricultural products, the value and necessity of doing things better, not worse than competitors must be regarded as all important," said Mr. W. A. Wilson, Canadian Government Animal Products Trade Commissioner in London, England, during his recent visit to the Dominion. "We made a good reputation with our first shipment of turkeys, because the quality was there and they were graded and packed according to government standards. The British trade responds to work well done. There is the market for Canadian poultry and other products and the password is quality."

The reason for exporting poultry to Britain should be designed for the 12 months of the year. Buyers over there do not want to change their source of supply if they can be assured of the demand being met at all times.

Canada should follow the same policy in connection with the present opportunity open for the export of dressed chickens as it has done with turkeys exported to Britain for the 1932 and 1933 Christmas trade. The 1,000,000 pounds of turkeys shipped in 1932 were 100 per cent. as to quality. In 1933 they were not quite so good as the previous year but this was due to some unusual difficulties associated with the shipping and are circumstances that will not recur. The British Christmas trade must reach the buyers at least one week before Christmas day.

Cuba's Cattle Dogs
Visitors To Island Amazed At Cleverness Of Animals

Sheep-dogs are world-famed for their devotion and intelligence; but have you ever heard of cattle-dogs? Visitors to Cuba are amazed at the cleverness of these dogs of the island. In some of the ports animals are brought from the American continent cannot be landed directly on the shore. The steamer is taken as near shore as possible and the cattle must swim to land.

To show the animals the most perfect manner, specially trained dogs are employed. Beside each animal two of the dogs swim, pushing the creature with their noses just behind its ears.

As soon as the boat's feet touch the bottom, and the dogs feel that their charge is safe, they at once return to the ship to bring in another one. This clever dogs will do again and again without receiving any orders from their masters.—Our Dumb Animals.

Should Receive Credit
Norwegian's Forecasts Are Valuable To Atlantic Ice Patrol

A volunteer assistant to the Atlantic Ice Patrol, who should have credit for his forecasts, is the Norwegian meteorologist Hildebrand Eke. A friend of Nansen, he established on Jan. Mayen Island several years ago a wireless station for the purpose of transmitting weather reports. A more desolate place above the Arctic Circle is hard to imagine. There with his meager resources he set up a scientific laboratory. The United States government provided him with a serviceable wireless plant and he began to dispatch reports to the Cape Race station. It was his idea that if he could supply advance information of the state of the ice in the spring break-up, it would be helpful to the International Ice Patrol.—New York Times.

A Popular Vegetable
Asparagus Was Used By Early Greeks And Romans

Asparagus was esteemed as a vegetable when Greece and Rome were at the height of their glory, and is very popular today. The name, a Greek word, has had various forms in English and in the eighteenth century the corruption "sparrow grass" was popularly used. While this was used to-day be considered a sign of ignorance, Walker's Dictionary said in 1781: "Sparrow grass is so general that 'asparagus' has an air of stiffness and pedantry." On the steps of Russia this plant grows wild in such profusion that the cattle eat it like grass.

Safer To Leave
A bashful carafe found the young ladies in the parish too helpful. At last it became so embarrassing that he left.

Not long afterwards he met the curate who had succeeded him. "Well," he asked "how do you get on with the ladies?"

"Oh, very well indeed," said the other. "There is safety in numbers, you know."

"Ah!" he said the instant reply. "I only found it in Exodus!"

The following letter written by Edmund Platt of Garden City appeared in a recent issue of the New York Herald Tribune:

When Mr. Lippmann writes about the so-called war debts he has something to say worth reading. He did well to point out that when the United States first entered the war our part was expected to be mostly financial. We were to furnish a large part of the munitions and food for our Allies in Europe and were to pay the bills—as our contribution, not as loans. We did pay the bills, but instead of regarding them as a part of our own war costs we charged them up, added the interest and finally refunded the whole thing into an impossible pyramid of principal and interest to be repaid over a period of some sixty years.

It seems to me that it is not yet too late to separate that part of the war loans that should never have been charged against our Allies from the loans that were used for reconstruction. Roughly all of the loans made during the first year after our entry into the war, down to April, 1918, when we had practically no troops in the field, should be cancelled. The money was all spent in our own country and the supplies sent to our Allies by its spending saved the lives of thousands of our boys. Why should we expect this money to be paid back to us? Cancelling the first year's loans would wipe out more than half of the debt and leave a sum that could probably be managed.

The trouble with the debts, as Mr. Lippmann says, came from charging the original advances as loans and failing to distinguish between such proper contributions to the success of the war and the reconstruction loans.

Wouldn't it be much cheaper to cancel half the war debts and so stop making gold more valuable by continuing to add to our already superfluous hoard through war debt payments?

Hog Sales In West
Alberta Stands Second As Hog Producing Province

Alberta stands second only to Ontario as Canada's largest hog producing province. In 1933 Alberta produced 32,169 hogs, or 32.36 per cent. of the total marketed in Canada. Ontario marketed 1,368,939, or 42.65 per cent. of the total. Saskatchewan ranked third with a total of 490,299 hogs or 15.37 per cent. Manitoba fourth with 244,377 and Quebec fifth with 65,768 hogs. Over 55 per cent. of Canada's hog crop comes from the three prairie provinces.

Ontario has the highest quality, 24.23 per cent. of her hogs grading select and 78 per cent. grading in the two top grades. Manitoba is second in quality, 17 per cent. grading select and 58 per cent. in the two top grades. Saskatchewan is third with nearly 12 per cent. select and 44 per cent. in the two top grades and Alberta fourth with 8 per cent. select and 40 per cent. in the two top grades.

The Law Of Averages
Professor Experiments With Coppers And Proves His Theory

The underlying law of 50-50 is O.K. That's what Professor Pope Hill, the penny experimenter of the University of Georgia, has found after 100,000 tests.

Several years ago the professor placed 200 pennies in a can. A hundred of them were dated 1919 and the remainder 1920. They were weighed on chemical balances and paired according to weight. The pennies were thoroughly mixed and one coin was drawn and its date recorded. It was returned to the can, the pennies stirred, and another coin drawn and the date recorded. This was done 100,000 times.

Of the draws 50,145 came out 1920 and 49,855 were in 1919. "The experiment," the professor said, "gives very strong evidence that the underlying law of half and half actually does work out in practice."

A Hard Task
There are reported to be 6,000,000 youngsters in the United States who have never been in employment but who are eager to make a start on the careers for which they have studied and planned. Finding jobs for all these and for the new groups which the schools and universities are turning out each year is a task for somebody with a magic wand. It is so much easier to state a problem than to find a remedy.

In British Columbia where grasshoppers have been at a low ebb in recent years, there were evidences in 1933 of a general increase that may preface a further outbreak in this province in a few years, particularly on the dry cattle ranges.—Dominion Entomological Branch.

A deaf and dumb person who is fairly expert at finger language can speak about 43 words a minute.

Wedding Bells

Are Ringing

Kettel-Van Dyke

A very pretty wedding was solemnized in Spruceville Hall on June 27th when Mr. Ray Kettel and Miss Emma Van Dyke were joined in holy matrimony, the Rev. Mr. Mathews conducting the ceremony with Rev. O. W. Cross of Red Deer assisting. Mrs. H. Woody played the wedding march. The bride was prettily gowned in white net and carried a bouquet of peonies. Assisting the bride were the two Misses Van Dyke and the groom was supported by Mr. Brunson.

Mr. B. Ward entertained the guests with several songs, others taking part were Mrs. H. Woody, Miss Marg. Woody and Mr. A. Gibson. Another notable event was that Mr. and Mrs. A. Kettel, Sr., were married just 48 years ago. The esteemed couple were showered with confetti. At 1 p.m., a lovely wedding dinner was served, and in the evening the young couple left by car for Calgary and Banff.

Sharp-Suitor

On Saturday, June 30, a quiet, but pretty wedding was solemnized at the home of Mr. and Mrs. W. E. Suitor, of Spring Valley, Lacombe, Alta., when their eldest daughter, Helen S. M., was united in marriage to Mr. W. Howard Sharp, son of Mr. and Mrs. Wm. Sharp, of Lacombe, the Rev. W. B. Beard, of Clive, officiating.

The bride was becomingly attired in a gown of peach colored flat silk crepe, trimmed with net and carried an arm bouquet of yellow carnations and sweet peas. She entered the living room on her father's arm to the strains of the wedding march, played by Mrs. Alex Sharp. Her bridesmaid, Miss Viola McLean, looked charming in blue silk organdie, and carried pale pink peonies. The groom was supported by the bride's brother, Mr. Austin Suitor.

Only the immediate members of the two families were present. The happy couple left immediately after the ceremony for Eastern Canada, to visit the bride's grandparents and other relatives.

The bride travelled in a lemon tint silk crepe ensemble suit. On their return they will reside at Meadowbrook where the groom is employed as a teacher.

The happy young couple were the recipients of many useful gifts including china, silverware and clothing, testifying to the high esteem in which they are held.

Munce-Burton

An interesting wedding took place on Wednesday, June 27th at the home of Mr. and Mrs. W. W. Munce, Sunny Crest, when Harry D. Munce, was united in marriage to Vera M. Burton, by Rev. R. B. Layton. They were accompanied by Lorne Burton.

and Martha Munce. Five little nieces of the bride and groom carried little baskets of wild flowers. They were dressed in pastel organdie, blue, green and yellow. Freddie Crocker, held the ring and was supported by Kenny Sayers, Ponoka, also a wedding guest of the bride.

The bride was gowned in white silk and carried a bouquet of American Beauty Roses. The couple stood under an arch of evergreen, trimmed with flowers. After the ceremony, a sumptuous repast was served, following which the young couple left for a honeymoon at Banff.

The bride's going-away suit was navy blue, with white accessories. She carried also a fine fox fur which was her grandmother's.

The young couple will reside south west of Lacombe.

FOUR TIMES BETTER THAN COMMON REMEDIES FOR INDIGESTION

Probably you know several reliefs for acid stomach, indigestion and similar ills. But Bismar-Bax is a new, delicious tasting antacid powder that acts FOUR TIMES to give you quick relief. It neutralizes excess acid, relieves gas; soothes irritated membranes; and aids digestion of foods likely to ferment. Get a jar today at The Meridian Drug Co., Ltd., the Roskill Drug Store. Big jar for only 75c.

COLE ESTRAY

Yearling, iron grey when shod; mare, test since May. White strip on face, crooked hind leg. Last seen near G. L. Lord's. Reward. John Outthrust, B6, Ponoka.

Away with "COOK-STOVE BLUES"

COOKING hot, heavy foods for breakfast is wearying work. Why not give your family a treat, and save yourself time and toll? Serve Kellogg's Corn Flakes. Delicious, nourishing, and ready in a jiffy!

Kellogg's are economical too. Many servings cost only a few pennies. Made by Kellogg in London, Ont.

Kellogg's
